ACTB / Beta Actin Antibody (aa359-368)

Rabbit Polyclonal Antibody
Catalog # ALS11296

Specification

ACTB / Beta Actin Antibody (aa359-368) - Product Information

Application	**IHC**
Primary Accession	P60709
Reactivity	**Human, Mouse, Rat, Hamster, Monkey, Pig, Goat, Sheep, Bovine, Guinea Pig**
Host	**Rabbit**
Clonality	**Polyclonal**
Calculated MW	**42kDa KDa**

ACTB / Beta Actin Antibody (aa359-368) - Additional Information

Gene ID 60

Other Names
Actin, cytoplasmic 1, Beta-actin, Actin, cytoplasmic 1, N-terminally processed, ACTB

Target/Specificity
Amino acids 359-368 of Human beta Actin.

Reconstitution & Storage
Short term 4°C, long term aliquot and store at -20°C, avoid freeze thaw cycles. Store undiluted.

Precautions
ACTB / Beta Actin Antibody (aa359-368) is for research use only and not for use in diagnostic or therapeutic procedures.

ACTB / Beta Actin Antibody (aa359-368) - Protein Information

Name ACTB

Function
Actin is a highly conserved protein that polymerizes to produce filaments that form cross-linked networks in the cytoplasm of cells (PubMed:29581253). Actin exists in both monomeric (G-actin) and polymeric (F-actin) forms, both forms playing key functions, such as cell motility and contraction (PubMed:29581253). In addition to their role in the cytoplasmic cytoskeleton, G- and F-actin also localize in the nucleus, and regulate gene transcription and motility and repair of damaged DNA (PubMed:29925947). Part of the ACTR1A/ACTB filament around which the dynactin complex is built. The dynactin multiprotein complex activates the molecular motor dynein for ultra-processive transport along microtubules (By similarity).

Cellular Location
Cytoplasm, cytoskeleton. Nucleus Note=Localized in cytoplasmic mRNP granules containing untranslated mRNAs.

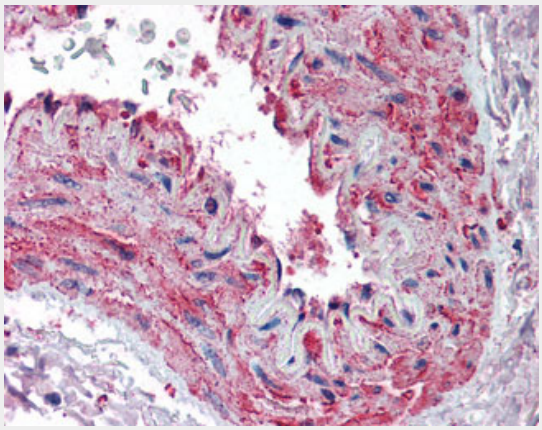

Volume
50 µl

ACTB / Beta Actin Antibody (aa359-368) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

ACTB / Beta Actin Antibody (aa359-368) - Images

Anti-Beta Actin antibody IHC of human skeletal muscle, vessel.

ACTB / Beta Actin Antibody (aa359-368) - Background

Actins are highly conserved proteins that are involved in various types of cell motility and are ubiquitously expressed in all eukaryotic cells.
