

**Myc Tag Antibody**  
Purified Mouse Monoclonal Antibody (Mab)  
Catalog # AM1007a

**Specification**

**Myc Tag Antibody - Product Information**

Application	<b>WB,E</b>
Host	<b>Mouse</b>
Clonality	<b>Monoclonal</b>
Isotype	<b>Mouse IgG1</b>
Clone Names	<b>9E10</b>

**Myc Tag Antibody - Additional Information**

**Other Names**

Tag from c-Myc protein

**Target/Specificity**

KLH conjugated synthetic peptide encoding c-Myc tag (AEEQKLISEEDLLRKRREQLKHKLE) was used as antigen.

**Dilution**

WB ~ 1:2000

**Format**

Purified monoclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is purified through a protein G column, followed by dialysis against PBS.

**Storage**

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Myc Tag Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Myc Tag Antibody - Protein Information**

**Myc Tag Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)

Anti-Myc Tag Antibody at 1:2000 dilution + 12 tag recombinant protein lysate Lysates/proteins at 20 µg per lane. Secondary Goat Anti-mouse IgG, (H+L), Peroxidase conjugated at 1/10000 dilution. Predicted band size : 45-50 kDa Blocking/Dilution buffer: 5% NFDN/TBST.

Western blot analysis of 12-tag protein lysate, using Myc Tag Antibody (Cat. #AM1007A). AM1007A was diluted at 1:2000. A goat anti-mouse IgG H&L (HRP) at 1:3000 dilution was used as the secondary antibody. Lysate at 20 µg.

**Myc Tag Antibody - Background**

- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Epitope tags consisting of short sequences recognized by well-characterized monoclonal antibodies have been widely used in the study of protein expression in various systems. The HA tag (YPYDVPDYA) and Myc Tag (AEEQKLISEEDLLRKRREQLKHKLE), recognized by monoclonal antibody clones 12CA5 and 9E10, respectively, are illustrative examples. Abgent's anti-Myc monoclonal antibody (Clone 9E10) provides a simple solution to detect the expression of a Myc-tagged protein in cells.
