

MS4A1/CD20 Antibody (C-term)
Mouse Monoclonal Antibody (Mab)
Catalog # AM1990b**Specification**

MS4A1/CD20 Antibody (C-term) - Product Information

Application	IHC, WB, IHC-P,E
Primary Accession	P11836
Other Accession	NP_690605.1 , NP_068769.2
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	33077
Antigen Region	266-294

MS4A1/CD20 Antibody (C-term) - Additional Information**Gene ID** 931**Other Names**

B-lymphocyte antigen CD20, B-lymphocyte surface antigen B1, Bp35, Leukocyte surface antigen Leu-16, Membrane-spanning 4-domains subfamily A member 1, CD20, MS4A1, CD20

Target/Specificity

This MS4A1/CD20 antibody is generated from mice immunized with a KLH conjugated synthetic peptide between 266-294 amino acids from the C-terminal region of human MS4A1/CD20.

Dilution

IHC~~1:1000
WB~~1:500~1000
IHC-P~~1:100

Format

Purified polyclonal antibody supplied in PBS with 0.09% (W/V) sodium azide. This antibody is prepared by Saturated Ammonium Sulfate (SAS) precipitation followed by dialysis against PBS.

Storage

Maintain refrigerated at 2-8°C for up to 2 weeks. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

MS4A1/CD20 Antibody (C-term) is for research use only and not for use in diagnostic or therapeutic procedures.

MS4A1/CD20 Antibody (C-term) - Protein Information**Name** MS4A1

Synonyms CD20

Function B-lymphocyte-specific membrane protein that plays a role in the regulation of cellular calcium influx necessary for the development, differentiation, and activation of B-lymphocytes (PubMed:[3925015](#), PubMed:[7684739](#), PubMed:[12920111](#)). Functions as a store-operated calcium (SOC) channel component promoting calcium influx after activation by the B-cell receptor/BCR (PubMed:[7684739](#), PubMed:[12920111](#), PubMed:[18474602](#)).

Cellular Location

Cell membrane; Multi-pass membrane protein. Cell membrane; Lipid-anchor. Note=Constitutively associated with membrane rafts.

Tissue Location

Expressed on B-cells.

MS4A1/CD20 Antibody (C-term) - Protocols

Provided below are standard protocols that you may find useful for product applications.

MS4A1/CD20 Antibody (C-term) - Images

Immunohistochemical analysis of paraffin-embedded Human tonsil section using Pink1(Cat#AM1990b). AM1990b was diluted at 1:1000 dilution. A undiluted biotinylated goat polyclonal antibody was used as the secondary, followed by DAB staining.

MS4A1/CD20 Antibody (C-term) (Cat. #AM1990b) western blot analysis in Ramos cell line lysates (35µg/lane). This demonstrates the MS4A1/CD20 antibody detected the MS4A1/CD20 protein (arrow).

AM1990b staining MS4A1/CD20 in human tonsil tissue sections by Immunohistochemistry (IHC-P - paraformaldehyde-fixed, paraffin-embedded sections). Tissue was fixed with formaldehyde and blocked with 3% BSA for 0.5 hour at room temperature; antigen retrieval was by heat mediation with a citrate buffer (pH6). Samples were incubated with primary antibody (1/100) for 1 hour at 37°C. A undiluted biotinylated goat polyvalent antibody was used as the secondary antibody.

MS4A1/CD20 Antibody (C-term) - Background

This gene encodes a member of the membrane-spanning 4A gene family. Members of this nascent protein family are characterized by common structural features and similar intron/exon splice boundaries and display unique expression patterns among hematopoietic cells and nonlymphoid tissues. This gene encodes a B-lymphocyte surface molecule which plays a role in the development and differentiation of B-cells into plasma cells. This family member is localized to 11q12, among a cluster of family members. Alternative splicing of this gene results in two transcript variants which encode the same protein.
