WB
Human
Mouse
monoclonal
IgG1
60 KDa

Mitochondria Antibody - Additional Information

Target/Specificity

Human cell homogenate.

Dilution

WB~~ 1:1000

Format

Total IgG fraction

Antibody Specificity

Specific for human mitochondria in all cell types. The antibody works on acetone fixed and 2% paraformaldehyde fixed cells. The antibody also works for immunohistochemistry on 2% paraformaldehyde fixed (5-10 minutes) cryostat sections.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Mitochondria Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Shipping

Blue Ice

Mitochondria Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry

- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

Mitochondria Antibody - Images

Western blot of HeLa lysate showing specific immunolabeling of the ~ 60kmitochondrial protein.

Mitochondria Antibody - Background

Mitochondria are most commonly known as the power plants of the cell as they produce ATP, but they are also involved in many other important cellular processes such as cell signaling, growth and differentiation (McBride et al., 2006). In addition, mitochondria have been shown to play a role in apoptosis (Green 1998). This antibody is an excellent marker for human cells in xenographic model research. It reacts specifically with human cells, including neurons and embryonic stem cells.
