

DIABLO Antibody (monoclonal) (M02)**Mouse monoclonal antibody raised against a partial recombinant DIABLO.****Catalog # AT1763a****Specification**

DIABLO Antibody (monoclonal) (M02) - Product Information

Application	WB, E
Primary Accession	O9NR28
Other Accession	BC011909
Reactivity	Human
Host	mouse
Clonality	Monoclonal
Isotype	IgG2a Kappa
Calculated MW	27131

DIABLO Antibody (monoclonal) (M02) - Additional Information**Gene ID** 56616**Other Names**

Diablo homolog, mitochondrial, Direct IAP-binding protein with low pI, Second mitochondria-derived activator of caspase, Smac, DIABLO, SMAC

Target/Specificity

DIABLO (AAH11909, 119 a.a. ~ 218 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Dilution

WB~~1:500~1000

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

DIABLO Antibody (monoclonal) (M02) is for research use only and not for use in diagnostic or therapeutic procedures.

DIABLO Antibody (monoclonal) (M02) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)

- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

DIABLO Antibody (monoclonal) (M02) - Images

Antibody Reactive Against Recombinant Protein. Western Blot detection against Immunogen (36.63 kDa) .

Western Blot analysis of DIABLO expression in transfected 293T cell line by DIABLO monoclonal antibody (M02), clone 4F9.

Lane 1: DIABLO transfected lysate (27.131 kDa).

Lane 2: Non-transfected lysate.

Detection limit for recombinant GST tagged DIABLO is approximately 0.3ng/ml as a capture antibody.

DIABLO Antibody (monoclonal) (M02) - Background

This gene encodes an inhibitor of apoptosis protein (IAP)-binding protein. The encoded mitochondrial protein enters the cytosol when cells undergo apoptosis, and it moderates the caspase inhibition of IAPs. Multiple polyadenylation sites have been found for this gene. Four alternatively spliced transcript variants have been described for this gene, with two of them encoding different isoforms and the other two probably not encoding a protein.
