

RPL32 Antibody (monoclonal) (M01)

Mouse monoclonal antibody raised against a partial recombinant RPL32.

Catalog # AT3705a

Specification

RPL32 Antibody (monoclonal) (M01) - Product Information

| | |
|-------------------|---------------------------|
| Application | E |
| Primary Accession | P62910 |
| Other Accession | NM_000994 |
| Reactivity | Human |
| Host | mouse |
| Clonality | Monoclonal |
| Isotype | IgG2a Kappa |
| Calculated MW | 15860 |

RPL32 Antibody (monoclonal) (M01) - Additional Information

Gene ID 6161

Other Names

60S ribosomal protein L32, RPL32

Target/Specificity

RPL32 (NP_000985, 33 a.a. ~ 132 a.a) partial recombinant protein with GST tag. MW of the GST tag alone is 26 KDa.

Format

Clear, colorless solution in phosphate buffered saline, pH 7.2 .

Storage

Store at -20°C or lower. Aliquot to avoid repeated freezing and thawing.

Precautions

RPL32 Antibody (monoclonal) (M01) is for research use only and not for use in diagnostic or therapeutic procedures.

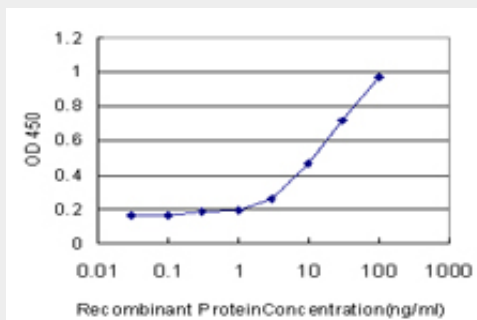

RPL32 Antibody (monoclonal) (M01) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)

- [Cell Culture](#)

RPL32 Antibody (monoclonal) (M01) - Images

Detection limit for recombinant GST tagged RPL32 is approximately 0.3ng/ml as a capture antibody.

RPL32 Antibody (monoclonal) (M01) - Background

Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L32E family of ribosomal proteins. It is located in the cytoplasm. Although some studies have mapped this gene to 3q13.3-q21, it is believed to map to 3p25-p24. As is typical for genes encoding ribosomal proteins, there are multiple processed pseudogenes of this gene dispersed through the genome. Alternatively spliced transcript variants encoding the same protein have been observed for this gene.
