

GTPBP10 Antibody (C-term) Blocking peptide

Synthetic peptide Catalog # BP12715b

Specification

GTPBP10 Antibody (C-term) Blocking peptide - Product Information

Primary Accession

A4D1E9

GTPBP10 Antibody (C-term) Blocking peptide - Additional Information

Gene ID 85865

Other Names

GTP-binding protein 10, Protein obg homolog 2, ObgH2, GTPBP10, OBGH2

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

GTPBP10 Antibody (C-term) Blocking peptide - Protein Information

Name GTPBP10

Synonyms OBGH2

Function

May be involved in the ribosome maturation process. Complements an ObgE(CgtA) function in E.coli ribosome maturation. Plays a role of GTPase in vitro. When missing, disorganization of the nucleolar architecture is observed.

Cellular Location

Nucleus, nucleolus. Chromosome. Note=Found in the dense fibrillar compartment region of the nucleolus. At the onset of mitosis moves to the chromosome surface and remains there until anaphase Gradually re-assembles into the nucleolus at late anaphase to telophase

GTPBP10 Antibody (C-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides

GTPBP10 Antibody (C-term) Blocking peptide - Images GTPBP10 Antibody (C-term) Blocking peptide - Background

Small G proteins, such as GTPBP10, act as molecularswitches that play crucial roles in the regulation of fundamentalcellular processes such as protein synthesis, nuclear transport, membrane trafficking, and signal transduction (Hirano et al., 2006[PubMed 17054726]).
