

## CTBP2 Antibody (N-term) Blocking peptide

Synthetic peptide Catalog # BP12902a

### **Specification**

## CTBP2 Antibody (N-term) Blocking peptide - Product Information

Primary Accession

P56545

# CTBP2 Antibody (N-term) Blocking peptide - Additional Information

**Gene ID 1488** 

#### **Other Names**

C-terminal-binding protein 2, CtBP2, CTBP2

#### **Format**

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

#### **Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

#### **Precautions**

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

#### CTBP2 Antibody (N-term) Blocking peptide - Protein Information

## Name CTBP2

#### **Function**

Corepressor targeting diverse transcription regulators. Functions in brown adipose tissue (BAT) differentiation (By similarity).

# **Cellular Location**

Nucleus. Synapse.

### **Tissue Location**

Ubiquitous. Highest levels in heart, skeletal muscle, and pancreas

# CTBP2 Antibody (N-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

### CTBP2 Antibody (N-term) Blocking peptide - Background

This gene produces alternative transcripts encoding two distinct proteins. One protein is a transcriptional repressor, while the other isoform is a major component of specialized synapses known as synaptic ribbons. Both proteins contain a NAD+binding domain similar to NAD+-dependent 2-hydroxyacid dehydrogenases. A portion of the 3' untranslated region was used tomap this gene to chromosome 21q21.3; however, it was noted that similar loci elsewhere in the genome are likely. Blast analysis shows that this gene is present on chromosome 10. [provided by RefSeq].
