

HEBP2 Antibody (N-term) Blocking Peptide
Synthetic peptide
Catalog # BP13181a**Specification**

HEBP2 Antibody (N-term) Blocking Peptide - Product InformationPrimary Accession [Q9Y5Z4](#)**HEBP2 Antibody (N-term) Blocking Peptide - Additional Information****Gene ID** 23593**Other Names**

Heme-binding protein 2, Placental protein 23, PP23, Protein SOUL, HEBP2, C6orf34, SOUL

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13181a was selected from the N-term region of HEBP2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

HEBP2 Antibody (N-term) Blocking Peptide - Protein Information**Name** HEBP2**Synonyms** C6orf34, SOUL**Function**

Can promote mitochondrial permeability transition and facilitate necrotic cell death under different types of stress conditions.

Cellular Location

Cytoplasm. Mitochondrion. Note=Mainly localized to the cytoplasm with a much lower abundance in the mitochondrion

Tissue Location

Detected in placenta..

HEBP2 Antibody (N-term) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.
