

STARD10 Antibody (Center) Blocking peptide

Synthetic peptide Catalog # BP13389c

Specification

STARD10 Antibody (Center) Blocking peptide - Product Information

Primary Accession

09Y365

STARD10 Antibody (Center) Blocking peptide - Additional Information

Gene ID 10809

Other Names

PCTP-like protein, PCTP-L, Antigen NY-CO-28, START domain-containing protein 10, StARD10, Serologically defined colon cancer antigen 28, StAR-related lipid transfer protein 10, STARD10, SDCCAG28

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP13389c was selected from the Center region of STARD10. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

STARD10 Antibody (Center) Blocking peptide - Protein Information

Name STARD10

Synonyms SDCCAG28

Function

May play metabolic roles in sperm maturation or fertilization (By similarity). Phospholipid transfer protein that preferentially selects lipid species containing a palmitoyl or stearoyl chain on the sn-1 and an unsaturated fatty acyl chain (18:1 or 18:2) on the sn-2 position. Able to transfer phosphatidylcholine (PC) and phosphatidyetanolamline (PE) between membranes.

Cellular Location

Cell projection, cilium, flagellum. Cytoplasm. Membrane. Note=In testis was predominantly detected at the flagella of elongated spermatids, with a strong signal also found at the tail of epididymal sperm (By similarity). Mainly cytosolic.

STARD10 Antibody (Center) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

• Blocking Peptides
