

Thioredoxin 2 (Trx2) Antibody (c-term) Blocking peptide

Synthetic peptide Catalog # BP1338b

Specification

Thioredoxin 2 (Trx2) Antibody (c-term) Blocking peptide - Product Information

Primary Accession

Q99757

Thioredoxin 2 (Trx2) Antibody (c-term) Blocking peptide - Additional Information

Gene ID 25828

Other Names

Thioredoxin, mitochondrial, MTRX, Mt-Trx, Thioredoxin-2, TXN2, TRX2

Target/Specificity

The synthetic peptide sequence used to generate the antibody AP1338b was selected from the C-term region of human Trx2. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

Thioredoxin 2 (Trx2) Antibody (c-term) Blocking peptide - Protein Information

Name TXN2

Synonyms TRX2

Function

Important for the control of mitochondrial reactive oxygen species homeostasis, apoptosis regulation and cell viability. Possesses a dithiol-reducing activity.

Cellular Location

Mitochondrion

Tissue Location

Widely expressed in adult (at protein level) and fetal tissues.

Thioredoxin 2 (Trx2) Antibody (c-term) Blocking peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

Blocking Peptides

Thioredoxin 2 (Trx2) Antibody (c-term) Blocking peptide - Background

TRX2 is a mitochondrial member of the thioredoxin family, a group of small multifunctional redox-active proteins. The encoded protein may play important roles in the regulation of the mitochondrial membrane potential and in protection against oxidant-induced apoptosis.
