

CHL1 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP8662c**Specification**

CHL1 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [O00533](#)**CHL1 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 10752**Other Names**

Neural cell adhesion molecule L1-like protein, Close homolog of L1, Processed neural cell adhesion molecule L1-like protein, CHL1, CALL

Target/Specificity

The synthetic peptide sequence used to generate the antibody [AP8662c](/products/AP8662c) was selected from the Center region of human CHL1. A 10 to 100 fold molar excess to antibody is recommended. Precise conditions should be optimized for a particular assay.

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

CHL1 Antibody (Center) Blocking Peptide - Protein Information**Name** CHL1**Synonyms** CALL**Function**

Extracellular matrix and cell adhesion protein that plays a role in nervous system development and in synaptic plasticity. Both soluble and membranous forms promote neurite outgrowth of cerebellar and hippocampal neurons and suppress neuronal cell death. Plays a role in neuronal positioning of pyramidal neurons and in regulation of both the number of interneurons and the efficacy of GABAergic synapses. May play a role in regulating cell migration in nerve regeneration and cortical development. Potentiates integrin-dependent cell migration towards extracellular matrix proteins. Recruits ANK3 to the plasma membrane (By similarity).

Cellular Location

Cell membrane; Single-pass type I membrane protein. Note=Soluble forms produced by cleavage/shedding also exist.

Tissue Location

Expressed in the fetal and adult brain as well as in Schwann cell culture. Also detected in adult peripheral tissues

CHL1 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Blocking Peptides](#)

CHL1 Antibody (Center) Blocking Peptide - Images**CHL1 Antibody (Center) Blocking Peptide - Background**

CHL1 is a member of the L1 gene family of neural cell adhesion molecules. It is a neural recognition molecule that may be involved in signal transduction pathways.
