

ACAD8 Antibody (Center) Blocking Peptide
Synthetic peptide
Catalog # BP9488c**Specification**

ACAD8 Antibody (Center) Blocking Peptide - Product InformationPrimary Accession [Q9UKU7](#)**ACAD8 Antibody (Center) Blocking Peptide - Additional Information****Gene ID** 27034**Other Names**

Isobutyryl-CoA dehydrogenase, mitochondrial, 1399-, Activator-recruited cofactor 42 kDa component, ARC42, Acyl-CoA dehydrogenase family member 8, ACAD-8, ACAD8, ARC42, IBD

Format

Peptides are lyophilized in a solid powder format. Peptides can be reconstituted in solution using the appropriate buffer as needed.

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C.

Precautions

This product is for research use only. Not for use in diagnostic or therapeutic procedures.

ACAD8 Antibody (Center) Blocking Peptide - Protein Information**Name** ACAD8 ([HGNC:87](#))**Synonyms** ARC42, IBD**Function**

Isobutyryl-CoA dehydrogenase which catalyzes the conversion of 2-methylpropanoyl-CoA to (2E)-2-methylpropenoyl-CoA in the valine catabolic pathway (PubMed:11013134, PubMed:12359132, PubMed:16857760). To a lesser extent, also able to catalyze the oxidation of (2S)-2-methylbutanoyl-CoA (PubMed:11013134, PubMed:12359132).

Cellular Location

Mitochondrion

Tissue Location

Detected at comparable levels in heart, lung, brain, skeletal muscle, pancreas and placenta. Weakly expressed in liver and kidney.

ACAD8 Antibody (Center) Blocking Peptide - Protocols

Provided below are standard protocols that you may find useful for product applications.

ACAD8 Antibody (Center) Blocking Peptide - Background

ACAD8 is a member of the acyl-CoA dehydrogenase family of enzymes that catalyze the dehydrogenation of acyl-CoA derivatives in the metabolism of fatty acids or branch chained amino acids. This protein is a mitochondrial enzyme that functions in catabolism of the branched-chain amino acid valine.
