

Leptin, murine recombinant protein
OB Protein, Obesity Protein, OBS, Obesity factor.
Catalog # PBV10252r

Specification

Leptin, murine recombinant protein - Product info

Primary Accession [P41160](#)
Calculated MW **16.2 kDa KDa**

Leptin, murine recombinant protein - Additional Info

Gene ID **16846**
Gene Symbol **LEP**
Other Names
OB Protein, Obesity Protein, OBS, Obesity factor.

Gene Source **Mouse**
Source **E. coli**
Assay&Purity **SDS-PAGE; ≥98%**
Assay2&Purity2 **HPLC;**
Recombinant **Yes**
Target/Specificity
Leptin

Application Notes

Reconstitute in 10 mM HCl to a concentration of 1 mg/ml. The solution can then be diluted into other aqueous buffers and stored at 4°C for 1 week or -20°C for future use.

Format

Lyophilized protein

Storage

-20°C; Lyophilized with no additives

Leptin, murine recombinant protein - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Leptin, murine recombinant protein - Background

Leptin (Anti-Obesity Protein) is the protein product of the ob (obese) gene in mice and seems to be involved in appetite control. The ob gene is expressed in adipose tissue and is thought to regulate the body's fat stores. Mice with the ob/ob genotype also develop a form of diabetes similar to type II (non-insulin dependent) diabetes. Murine Leptin is a 16 kDa protein containing 147 amino acid residues.
