SCREEN 24 ANTIBODIES FOR THE PRICE OF ONE

Single-Use Antibody Screening Panel

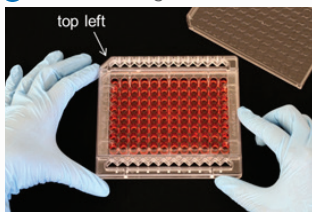

Single-Use Antibody Screening Panels

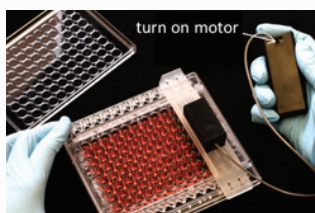

1 Prepare the Plate

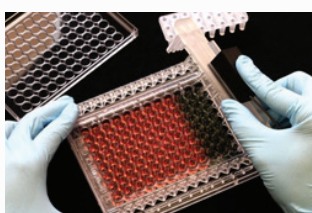

2 Assemble Alignment Tool

3 Insert Preloaded Sample Tray and Vibrate for 10 sec

4 24 Antibodies Deposited

How It Works

Abcepta offers single-use antibody panels for cost- and time-efficient screening assays. Drop and mix design makes screening rapid and affordable, and eliminates repetitive pipetting.

At Abcepta's website watch a demo video or read the User Manual for a step-by-step explanation of how to use antibody panels for your research project.

Benefits of Using Antibody Screening Panels

- ✓ Rapidly deposit preloaded antibodies into assay wells with a simple snap and shake procedure
- ✓ Screen samples against a diverse array of antibodies for the price of one full-sized antibody, without time-consuming pipetting
- ✓ Simultaneously detect against all key players in a pathway using popular highly-cited antibodies
- ✓ Achieve a granular screen for dozens of distinct epitope specific antibodies against a single targets to find the antibody optimal for your system
