

**Anti-Human IL-17 (IL-17A) Antibody**  
**Catalog # ABG10218****Specification**

---

**Anti-Human IL-17 (IL-17A) Antibody - Product Information**

Application	WB, IHC, E
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

**Anti-Human IL-17 (IL-17A) Antibody - Additional Information****Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hIL-17A. Anti-Human IL-17A specific antibody was purified by affinity chromatography employing immobilized hIL-17 matrix.

**WesternBlot**

To detect hIL-17A by Western Blot analysis this antibody can be used at a concentration of 0.1 - 0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hIL-17A is 1.5 - 3.0 ng/lane, under either reducing or non-reducing conditions.

**Sandwich**

To detect hIL-17A by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems's Biotinylated Anti-Human IL-17A (60-017ABT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hIL-17A.

**Immunohistochemistry**

This antibody stained formalin-fixed, paraffin-embedded sections of human breast invasive ductal carcinoma. The recommended concentration is 0.25 µg/ml with an overnight incubation at 4°C. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 6.0 sodium citrate buffer is recommended. Optimal concentrations and conditions may vary.

**Neutralization**

To yield one-half maximal inhibition [**ND**"><sub>50</sub></span>] of the biological activity of hIL-17A (50.0 ng/ml), a concentration of 0.9-1.3 µg/ml of this antibody is required.

**Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

**Reconstitution**

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

**Storage**

-20°C

**Precautions**

Anti-Human IL-17 (IL-17A) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### **Anti-Human IL-17 (IL-17A) Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
