

**Anti-Murine IL-9 Antibody**  
**Catalog # ABG10312****Specification**

---

**Anti-Murine IL-9 Antibody - Product Information**

|             |                   |
|-------------|-------------------|
| Application | <b>WB, E</b>      |
| Reactivity  | <b>Mouse</b>      |
| Host        | <b>Rabbit</b>     |
| Clonality   | <b>Polyclonal</b> |

**Anti-Murine IL-9 Antibody - Additional Information****Preparation**

Produced from sera of rabbits pre-immunized with highly pure recombinant Murine IL-9. Anti-Murine IL-9 specific antibody was purified by affinity chromatography employing immobilized Murine IL-9 matrix.

**WesternBlot**

To detect Murine IL-9 by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. When used in conjunction with compatible secondary reagents, the detection limit for recombinant Murine IL-9 is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

**Sandwich**

To detect Murine IL-9 by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems's Biotinylated Anti-Murine IL-9 (61-009BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant Murine IL-9.

**Neutralization**

To yield one-half maximal inhibition [**ND**"><sub>50</sub></span>] of the biological activity of Murine IL-9 (5.0 ng/ml), a concentration of 0.25-0.40 µg/ml of this antibody is required.

**Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

**Reconstitution**

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

**Storage**

-20°C

**Precautions**

Anti-Murine IL-9 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Anti-Murine IL-9 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.
