

Anti-Human MCP-1 Antibody
Catalog # ABG10352**Specification**

Anti-Human MCP-1 Antibody - Product Information

Application	WB, IHC, E
Reactivity	Human
Host	Rabbit
Clonality	Polyclonal

Anti-Human MCP-1 Antibody - Additional Information**Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hMCP-1(MCAF). Anti-Human MCP-1(MCAF) specific antibody was purified by affinity chromatography employing immobilized hMCP-1(MCAF) matrix.

WesternBlot

To detect hMCP-1(MCAF) by Western Blot analysis this antibody can be used at a concentration of 0.1-0.2 µg/ml. Used in conjunction with compatible secondary reagents the detection limit for recombinant hMCP-1(MCAF) is 1.5-3.0 ng/lane, under either reducing or non-reducing conditions.

Sandwich

To detect hMCP-1(MCAF) by sandwich ELISA (using 100 µl/well antibody solution) a concentration of 0.5 - 2.0 µg/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems's Biotinylated Anti-Human MCP-1(MCAF) (60-212BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hMCP-1(MCAF).

Immunohistochemistry

This antibody stained formalin-fixed, paraffin-embedded sections of human breast invasive ductal carcinoma. The recommended concentration is 2.5 µg/ml and a two-hour incubation at room temperature. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 6.0 Sodium Citrate buffer is recommended. Optimal concentrations and conditions may vary.

Formulation

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

Storage

-20°C

Precautions

Anti-Human MCP-1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Anti-Human MCP-1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.
