

### **Anti-Human WNT-3a Antibody**

Catalog # ABG10443

### **Specification**

## **Anti-Human WNT-3a Antibody - Product Information**

Application WB, IHC, E
Reactivity Human
Host Rabbit
Clonality Polyclonal

### Anti-Human WNT-3a Antibody - Additional Information

#### **Preparation**

Produced from sera of rabbits pre-immunized with highly pure (>98%) recombinant hWNT-3a. Anti-Human WNT-3a specific antibody was purified by affinity chromatography employing immobilized hWNT-3a matrix.

#### WesternBlot

To detect hWNT-3a by Western Blot analysis this antibody can be used at a concentration of  $0.1 - 0.2 \,\mu g/ml$ . Used in conjunction with compatible secondary reagents the detection limit for recombinant hWNT-3a is  $1.5 - 3.0 \, ng/lane$ , under either reducing or non-reducing conditions.

#### Sandwich

To detect hWNT-3a by sandwich ELISA (using 100  $\mu$ l/well antibody solution) a concentration of 0.5 - 2.0  $\mu$ g/ml of this antibody is required. This antigen affinity purified antibody, in conjunction with BioGems' Biotinylated Anti-Human WNT-3a (60-403BT) as a detection antibody, allows the detection of at least 0.2 - 0.4 ng/well of recombinant hWNT-3a.

### **Immunohistochemistry**

This antibody stained formalin-fixed, paraffin-embedded sections of human breast invasive ductal carcinoma. The recommended concentration is  $0.125~\mu g/ml$  -  $0.25~\mu g/ml$  with an overnight incubation at 4°C. An HRP-labeled polymer detection system was used with a DAB chromogen. Heat induced antigen retrieval with a pH 6.0 sodium citrate buffer is recommended. Optimal concentrations and conditions may vary.

#### **Formulation**

A sterile filtered antibody solution was lyophilized from PBS, pH 7.2.

## Reconstitution

Centrifuge vial prior to opening. Reconstitute in sterile water to a concentration of 0.1-1.0 mg/ml.

#### **Storage**

-20°C

#### Precautions

Anti-Human WNT-3a Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

# **Anti-Human WNT-3a Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- <u>Immunofluorescence</u>
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture
