

Anti-TACC1 Picoband Antibody

Catalog # ABO10302

### Specification

# Anti-TACC1 Picoband Antibody - Product Information

ApplicationWBPrimary Accession075410HostRabbitReactivityHuman, MouseClonalityPolyclonalFormatLyophilizedDescriptionRabbit lgG polyclonal antibody for Transforming acidic coiled-coil-contain

Rabbit IgG polyclonal antibody for Transforming acidic coiled-coil-containing protein 1(TACC1) detection. Tested with WB in Human; Mouse.

**Reconstitution** Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

## **Anti-TACC1 Picoband Antibody - Additional Information**

Gene ID 6867

**Other Names** Transforming acidic coiled-coil-containing protein 1, Gastric cancer antigen Ga55, Taxin-1, TACC1, KIAA1103

Calculated MW 87794 MW KDa

**Application Details** Western blot, 0.1-0.5 µg/ml, Human, Mouse<br>

Subcellular Localization

Cytoplasm . Nucleus . Cytoplasm, cytoskeleton, microtubule organizing center, centrosome . Midbody . Nucleus during interphase. Weakly concentrated at centrosomes during mitosis and colocalizes with AURKC at the midbody during cytokinesis. .

**Tissue Specificity** 

Isoform 1, isoform 3 and isoform 5 are ubiquitous. Isoform 2 is strongly expressed in the brain, weakly detectable in lung and colon, and overexpressed in gastric cancer. Isoform 4 is not detected in normal tissues, but strong expression was found in gastric cancer tissues. Down-regulated in a subset of cases of breast cancer.

**Protein Name** 

Transforming acidic coiled-coil-containing protein 1

Contents

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na2HPO4, 0.05mg NaN3.

#### Immunogen

A synthetic peptide corresponding to a sequence at the N-terminus of human TACC1 (196-235aa MTEGSMGVTLEASAEADLKAGNSCPELVPSRRSKLRKPKP), different from the related mouse sequence by fourteen amino acids.

**Purification** Immunogen affinity purified.

**Cross Reactivity** No cross reactivity with other proteins.

Storage

At -20°C for one year. After r°Constitution, at 4°C for one month. It°Can also be aliquotted and stored frozen at -20°C for a longer time.Avoid repeated freezing and thawing.

## Anti-TACC1 Picoband Antibody - Protein Information

Name TACC1

Synonyms KIAA1103

Function

Involved in transcription regulation induced by nuclear receptors, including in T3 thyroid hormone and all-trans retinoic acid pathways (PubMed:<a

href="http://www.uniprot.org/citations/20078863" target="\_blank">20078863</a>). Might promote the nuclear localization of the receptors (PubMed:<a

href="http://www.uniprot.org/citations/20078863" target="\_blank">20078863</a>). Likely involved in the processes that promote cell division prior to the formation of differentiated tissues.

#### **Cellular Location**

Cytoplasm. Nucleus. Cytoplasm, cytoskeleton, microtubule organizing center, centrosome. Midbody. Note=Nucleus during interphase. Weakly concentrated at centrosomes during mitosis and colocalizes with AURKC at the midbody during cytokinesis. [Isoform 10]: Cytoplasm

Tissue Location

Isoform 1, isoform 3 and isoform 5 are ubiquitous. Isoform 2 is strongly expressed in the brain, weakly detectable in lung and colon, and overexpressed in gastric cancer. Isoform 4 is not detected in normal tissues, but strong expression was found in gastric cancer tissues. Down-regulated in a subset of cases of breast cancer

### Anti-TACC1 Picoband Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

# Anti-TACC1 Picoband Antibody - Images

Western blot analysis of TACC1 expression in mouse testis extract (lane 1) and U87 whole cell lysates (lane 2). TACC1 at 100KD was detected using rabbit anti- TACC1 Antigen Affinity purified polyclonal antibody (Catalog # ABO10302) at 0.5  $\hat{1}/_4$ g/mL. The blot was developed using chemiluminescence (ECL) method .

# Anti-TACC1 Picoband Antibody - Background

Transforming acidic coiled-coil-containing protein 1 is a protein that in humans is encoded by the TACC1Â gene. This locus may represent a breast cancer candidate gene. It is located close to FGFR1 on a region of chromosome 8 that is amplified in some breast cancers. Three transcript variants encoding different isoforms have been found for this gene.
