Anti-PCK Antibody (Monoclonal, C-11+PCK-26+CY-90+KS-1A3+M20+A53-B/A2) - Background

Monoclonal anti cytokeratins are specific markers of epithelial cell differentiation and have been widely used as tools in tumor identification and classification. Monoclonal Anti Pan Cytokeratin(mixture) is a broadly reactive reagent, which recognizes epitopes present in most human epithelial tissues.
