

**Anti-B MyB Antibody**  
**Catalog # ABO11231****Specification**

---

**Anti-B MyB Antibody - Product Information**

Application	WB, IHC-P, ICC
Primary Accession	<a href="#">P10244</a>
Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Format	Lyophilized

**Description**

Rabbit IgG polyclonal antibody for Myb-related protein B(MYBL2) detection. Tested with WB, IHC-P, ICC in Human;Mouse;Rat.

**Reconstitution**

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

**Anti-B MyB Antibody - Additional Information**

**Gene ID** 4605

**Other Names**

Myb-related protein B, B-Myb, Myb-like protein 2, MYBL2, BMYB

**Calculated MW**

78764 MW KDa

**Application Details**

Immunocytochemistry , 0.5-1 µg/ml, Human, Mouse,  
Rat<br>Immunohistochemistry(Paraffin-embedded Section), 0.5-1 µg/ml, Human, Rat, Mouse, By  
Heat<br>Western blot, 0.1-0.5 µg/ml, Human, Rat, Mouse<br>

**Subcellular Localization**

Nucleus.

**Protein Name**

Myb-related protein B

**Contents**

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na<sub>2</sub>HPO<sub>4</sub>, 0.05mg Thimerosal, 0.05mg NaN<sub>3</sub>.

**Immunogen**

A synthetic peptide corresponding to a sequence at the N-terminus of human B MyB(1-17aa MSRRTRCEDLDELHYQD), identical to the related mouse sequence and different from the related rat sequence by two amino acids.

**Purification**

Immunogen affinity purified.

**Cross Reactivity**

No cross reactivity with other proteins

**Storage**

**At -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.**

**Sequence Similarities**

Contains 3 HTH myb-type DNA-binding domains.

**Anti-B MyB Antibody - Protein Information**

**Name** MYBL2

**Synonyms** BMYB

**Function**

Transcription factor involved in the regulation of cell survival, proliferation, and differentiation. Transactivates the expression of the CLU gene.

**Cellular Location**

Nucleus.

**Anti-B MyB Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

**Anti-B MyB Antibody - Background**

MYBL2(V-MYB avian myeloblastosis viral oncogene homolog-like 2), also called MYB-RELATED GENE BMYB, is a protein that in humans is encoded by the MYBL2 gene. The protein encoded by this gene, a member of the MYB family of transcription factor genes, is a nuclear protein involved in cell cycle progression. Barletta et al.(1991) assigned the MYBL2 gene to chromosome Xq13. However, Noben-Trauth et al.(1996) demonstrated that this assignment was an error. Using mouse Mybl2 cDNA clones as probes, they assigned Mybl2 in an interspecific backcross panel to distal mouse chromosome 2. Using human cDNA probes in combination with fluorescence in situ hybridization analysis, they localized MYBL2 to chromosome 20q13.1, a region that is commonly deleted in myeloid disorders and shows high homology of synteny to mouse chromosome 2. It has been shown to activate the cell division cycle 2, cyclin D1, and insulin-like growth factor-binding protein 5 genes. Transcript variants may exist for this gene, but their full-length natures have not been determined.
