

## **Anti-Prolactin Picoband Antibody**

**Catalog # ABO12101** 

#### **Specification**

# **Anti-Prolactin Picoband Antibody - Product Information**

Application WB
Primary Accession P06879
Host Reactivity Mouse
Clonality Polyclonal
Format Lyophilized

**Description** 

Rabbit IgG polyclonal antibody for Prolactin(PRL) detection. Tested with WB, ELISA in Mouse.

#### Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

## **Anti-Prolactin Picoband Antibody - Additional Information**

Other Names Prolactin, PRL, Prl

Calculated MW 25496 MW KDa

### **Application Details**

Western blot, 0.1-0.5 µg/ml, Mouse, -<br>ELISA, 0.1-0.5 µg/ml, Mouse<br>

#### **Subcellular Localization**

Secreted.

### **Protein Name**

Prolactin

## **Contents**

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na2HPO4, 0.05mg NaN3.

#### **Immunogen**

E. coli-derived mouse Prolactin recombinant protein (Position: L30-C226). Mouse Prolactin shares 59.8% and 84.8% amino acid (aa) sequence identity with human and rat Prolactin, respectively.

#### **Purification**

Immunogen affinity purified.

## **Cross Reactivity**

No cross reactivity with other proteins.

Storage At -20°C for one year. After r°Constitution, at 4°C for one month. It°Can also be

aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

## **Anti-Prolactin Picoband Antibody - Protein Information**

Name Prl

**Function** 

Prolactin acts primarily on the mammary gland by promoting lactation.

**Cellular Location** Secreted.

## **Anti-Prolactin Picoband Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

## **Anti-Prolactin Picoband Antibody - Images**

### **Anti-Prolactin Picoband Antibody - Background**

Prolactin (PRL) also known as luteotropic hormone (LTH) is a protein that in humans is encoded by the PRL gene. Prolactin is a peptide hormone discovered by Henry Friesen. Although it is perhaps

Tel: 858.875.1900 Fax: 858.875.1999

best known for its role in lactation, prolactin already existed in the oldest known vertebrates-fishes-where its most important functions were probably related to control of water and salt balance. Prolactin also acts in a cytokine-like manner and as an important regulator of the immune system. Prolactin has important cell cycle related functions as a growth-, differentiatingand anti-apoptotic factor. As a growth factor binding to cytokine like receptors it has also profound influence on hematopoiesis, angiogenesis and is involved in the regulation of blood clotting through several pathways.
