

Anti-Caldesmon Picoband Antibody
Catalog # ABO12607**Specification**

Anti-Caldesmon Picoband Antibody - Product Information

Application	WB, IHC-P
Primary Accession	Q05682
Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Format	Lyophilized

Description

Rabbit IgG polyclonal antibody for Caldesmon(CALD1) detection. Tested with WB, IHC-P in Human;Mouse;Rat.

Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

Anti-Caldesmon Picoband Antibody - Additional Information

Gene ID 800

Other Names

Caldesmon, CDM, CALD1, CAD, CDM

Calculated MW

93231 MW KDa

Application Details

Immunohistochemistry(Paraffin-embedded Section), 0.5-1 µg/ml, Human, Mouse, Rat, By Heat
Western blot, 0.1-0.5 µg/ml, Human, Rat

Subcellular Localization

Cytoplasm, cytoskeleton . Cytoplasm, myofibril . On thin filaments in smooth muscle and on stress fibers in fibroblasts (nonmuscle). .

Tissue Specificity

High-molecular-weight caldesmon (isoform 1) is predominantly expressed in smooth muscles, whereas low-molecular- weight caldesmon (isoforms 2, 3, 4 and 5) are widely distributed in non-muscle tissues and cells. Not expressed in skeletal muscle or heart.

Protein Name

Caldesmon

Contents

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na₂HPO₄, 0.05mg NaN₃.

Immunogen

E. coli-derived human Caldesmon recombinant protein (Position: M1-E120). Human Caldesmon

shares 87.6% amino acid (aa) sequence identity with rat Caldesmon.

Purification

Immunogen affinity purified.

Cross Reactivity

No cross reactivity with other proteins

Storage

At -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Anti-Caldesmon Picoband Antibody - Protein Information

Name CALD1

Synonyms CAD, CDM

Function

Actin- and myosin-binding protein implicated in the regulation of actomyosin interactions in smooth muscle and nonmuscle cells (could act as a bridge between myosin and actin filaments). Stimulates actin binding of tropomyosin which increases the stabilization of actin filament structure. In muscle tissues, inhibits the actomyosin ATPase by binding to F-actin. This inhibition is attenuated by calcium-calmodulin and is potentiated by tropomyosin. Interacts with actin, myosin, two molecules of tropomyosin and with calmodulin. Also plays an essential role during cellular mitosis and receptor capping. Involved in Schwann cell migration during peripheral nerve regeneration (By similarity).

Cellular Location

Cytoplasm, cytoskeleton {ECO:0000250|UniProtKB:P13505}. Cytoplasm, myofibril {ECO:0000250|UniProtKB:P13505}. Cytoplasm, cytoskeleton, stress fiber {ECO:0000250|UniProtKB:P13505}. Note=On thin filaments in smooth muscle and on stress fibers in fibroblasts (nonmuscle) {ECO:0000250|UniProtKB:P13505}

Tissue Location

High-molecular-weight caldesmon (isoform 1) is predominantly expressed in smooth muscles, whereas low-molecular-weight caldesmon (isoforms 2, 3, 4 and 5) are widely distributed in non-muscle tissues and cells. Not expressed in skeletal muscle or heart

Anti-Caldesmon Picoband Antibody - Protocols

Anti-Caldesmon Picoband Antibody - Images

Western blot analysis of Caldesmon expression in rat skeletal muscle extract (lane 1) and HELA whole cell lysates (lane 2). Caldesmon at 93KD was detected using rabbit anti- Caldesmon Antigen Affinity purified polyclonal antibody (Catalog # ABO12607) at 0.5 μ g/mL. The blot was developed using chemiluminescence (ECL) method .

Caldesmon was detected in paraffin-embedded sections of mouse intestine tissues using rabbit anti- Caldesmon Antigen Affinity purified polyclonal antibody (Catalog # ABO12607) at 1 μ g/mL. The immunohistochemical section was developed using SABC method .

Caldesmon was detected in paraffin-embedded sections of rat intestine tissues using rabbit anti- Caldesmon Antigen Affinity purified polyclonal antibody (Catalog # ABO12607) at 1 μ g/mL. The

immunohistochemical section was developed using SABC method .

Caldesmon was detected in paraffin-embedded sections of human intestinal tissues using rabbit anti- Caldesmon Antigen Affinity purified polyclonal antibody (Catalog # ABO12607) at 1 µg/mL. The immunohistochemical section was developed using SABC method .

Anti-Caldesmon Picoband Antibody - Background

Caldesmon is a protein that in humans is encoded by the CALD1 gene. It is mapped to 7q33. This gene encodes a calmodulin- and actin-binding protein that plays an essential role in the regulation of smooth muscle and nonmuscle contraction. The conserved domain of this protein possesses the binding activities to Ca(2+)-calmodulin, actin, tropomyosin, myosin, and phospholipids. This protein is a potent inhibitor of the actin-tropomyosin activated myosin MgATPase, and serves as a mediating factor for Ca(2+)-dependent inhibition of smooth muscle contraction. Alternative splicing of this gene results in multiple transcript variants encoding distinct isoforms.
