

Anti-CIITA Picoband Antibody
Catalog # ABO12681**Specification****Anti-CIITA Picoband Antibody - Product Information**

Application	WB, IHC-P
Primary Accession	P33076
Host	Rabbit
Reactivity	Human, Mouse, Rat
Clonality	Polyclonal
Format	Lyophilized

Description

Rabbit IgG polyclonal antibody for MHC class II transactivator(CIITA) detection. Tested with WB, IHC-P in Human;Mouse;Rat.

Reconstitution

Add 0.2ml of distilled water will yield a concentration of 500ug/ml.

Anti-CIITA Picoband Antibody - Additional Information

Gene ID 4261

Other Names

MHC class II transactivator, CIITA, 2.3.1.-, 2.7.11.1, CIITA, MHC2TA

Calculated MW

sc 9869|sc 48797|sc 9868|sc 13556|sc 9870|sc 9867|sc 376174|sc 48797 X|sc 9870 X|sc 9869 X|sc 9867 X|sc 376174 X|sc 9868 X|sc 13556 X KDa

Application Details

Immunohistochemistry(Paraffin-embedded Section), 0.5-1 µg/ml, Human, Mouse, Rat, By Heat

Western blot, 0.1-0.5 µg/ml, Human, Mouse, Rat

Subcellular Localization

MHC class II transactivator;CIITA;2.3.1.-;2.7.11.1;CIITA;MHC2TA;

Tissue Specificity

MHC class II transactivator

Source

123514 MW

Protein Name

Essential for transcriptional activity of the HLA class II promoter; activation is via the proximal promoter. No DNA binding of in vitro translated CIITA was detected. May act in a coactivator-like fashion through protein-protein interactions by contacting factors binding to the proximal MHC class II promoter, to elements of the transcription machinery, or both. Alternatively it may activate HLA class II transcription by modifying proteins that bind to the MHC class II promoter. Also mediates enhanced MHC class I transcription; the promoter element requirements for

CIITA-mediated transcription are distinct from those of constitutive MHC class I transcription, and CIITA can functionally replace TAF1 at these genes. Exhibits intrinsic GTP-stimulated acetyltransferase activity. Exhibits serine/threonine protein kinase activity: can phosphorylate the TFIID component TAF7, the RAP74 subunit of the general transcription factor TFIIF, histone H2B at 'Ser-37' and other histones (in vitro). .

Contents

Each vial contains 5mg BSA, 0.9mg NaCl, 0.2mg Na₂HPO₄, 0.05mg NaN₃.

Immunogen

E.coli-derived human CIITA recombinant protein (Position: E945-R1130). Human CIITA shares 84.4% amino acid (aa) sequence identity with mouse CIITA.

Purification

Immunogen affinity purified.

Cross Reactivity

No cross reactivity with other proteins

Storage

At -20°C for one year. After reconstitution, at 4°C for one month. It can also be aliquotted and stored frozen at -20°C for a longer time. Avoid repeated freezing and thawing.

Anti-CIITA Picoband Antibody - Protein Information

Name CIITA ([HGNC:7067](#))

Synonyms MHC2TA

Function

Essential for transcriptional activity of the HLA class II promoter; activation is via the proximal promoter (PubMed: [16600381](http://www.uniprot.org/citations/16600381), PubMed: [17493635](http://www.uniprot.org/citations/17493635), PubMed: [7749984](http://www.uniprot.org/citations/7749984), PubMed: [8402893](http://www.uniprot.org/citations/8402893)). Does not bind DNA (PubMed: [16600381](http://www.uniprot.org/citations/16600381), PubMed: [17493635](http://www.uniprot.org/citations/17493635), PubMed: [7749984](http://www.uniprot.org/citations/7749984), PubMed: [8402893](http://www.uniprot.org/citations/8402893)). May act in a coactivator-like fashion through protein-protein interactions by contacting factors binding to the proximal MHC class II promoter, to elements of the transcription machinery, or both (PubMed: [8402893](http://www.uniprot.org/citations/8402893), PubMed: [7749984](http://www.uniprot.org/citations/7749984), PubMed: [16600381](http://www.uniprot.org/citations/16600381), PubMed: [17493635](http://www.uniprot.org/citations/17493635)). Alternatively it may activate HLA class II transcription by modifying proteins that bind to the MHC class II promoter (PubMed: [16600381](http://www.uniprot.org/citations/16600381), PubMed: [17493635](http://www.uniprot.org/citations/17493635), PubMed: [7749984](http://www.uniprot.org/citations/7749984), PubMed: [8402893](http://www.uniprot.org/citations/8402893)). Also mediates enhanced MHC class I transcription; the promoter element requirements for CIITA-mediated transcription are distinct from those of constitutive MHC class I transcription, and CIITA can functionally replace TAF1 at these genes. Activates CD74

transcription (PubMed:32855215). Exhibits intrinsic GTP- stimulated acetyltransferase activity (PubMed:11172716). Exhibits serine/threonine protein kinase activity: can phosphorylate the TFIID component TAF7, the RAP74 subunit of the general transcription factor TFIIF, histone H2B at 'Ser-37' and other histones (in vitro) (PubMed:24036077). Has antiviral activity against Ebola virus and coronaviruses, including SARS-CoV-2 (PubMed:32855215). Induces resistance by up-regulation of the p41 isoform of CD74, which blocks cathepsin-mediated cleavage of viral glycoproteins, thereby preventing viral fusion (PubMed:32855215).

Cellular Location

Nucleus. Nucleus, PML body. Note=Recruited to PML body by PML

Anti-CIITA Picoband Antibody - Protocols

Anti-CIITA Picoband Antibody - Images

Western blot analysis of CIITA expression in rat thymus extract (lane 1), mouse thymus extract (lane 2) and MCF-7 whole cell lysates (lane 3). CIITA at 123KD was detected using rabbit anti-CIITA Antigen Affinity purified polyclonal antibody (Catalog # ABO12681) at 0.5 µg/mL. The blot was developed using chemiluminescence (ECL) method .

CIITA was detected in paraffin-embedded sections of mouse spleen tissues using rabbit anti-CIITA Antigen Affinity purified polyclonal antibody (Catalog # ABO12681) at 1 μ g/mL. The immunohistochemical section was developed using SABC method .

CIITA was detected in paraffin-embedded sections of rat spleen tissues using rabbit anti- CIITA Antigen Affinity purified polyclonal antibody (Catalog # ABO12681) at 1 μ g/mL. The immunohistochemical section was developed using SABC method .

CIITA was detected in paraffin-embedded sections of human intestinal cancer tissues using rabbit anti- CIITA Antigen Affinity purified polyclonal antibody (Catalog # ABO12681) at 1 μ g/mL. The immunohistochemical section was developed using SABC method .

Anti-CIITA Picoband Antibody - Background

CIITA is a human gene which is mapped to 16p13. This gene encodes a protein with an acidic transcriptional activation domain, 4 LRRs (leucine-rich repeats) and a GTP binding domain. The protein is located in the nucleus and acts as a positive regulator of class II major histocompatibility complex gene transcription, and is referred to as the master control factor" for the expression of

these genes. Also
