

# Anti-Wnt5a Rabbit Monoclonal Antibody

Catalog # ABO13796

### Specification

# Anti-Wnt5a Rabbit Monoclonal Antibody - Product Information

Application	WB, IF, ICC, FC
Primary Accession	<u>P41221</u>
Host	Rabbit
Isotype	Rabbit IgG
Reactivity	Human
Clonality	Monoclonal
Format	Liquid
Description	
Anti Watsa Pabbit Manadanal Antibody	Tested in WR ICC/IE Flow

Anti-Wnt5a Rabbit Monoclonal Antibody . Tested in WB, ICC/IF, Flow Cytometry applications. This antibody reacts with Human.

## Anti-Wnt5a Rabbit Monoclonal Antibody - Additional Information

Gene ID 7474

Other Names Protein Wnt-5a, WNT5A

Calculated MW 42339 MW KDa

Application Details WB 1:500-1:1000<br>ICC/IF 1:50-1:200<br>FC 1:20

**Subcellular Localization** Secreted, extracellular space, extracellular matrix.

**Tissue Specificity** 

Expression is increased in differentiated thyroid carcinomas compared to normal thyroid tissue and anaplastic thyroid tumors where expression is low or undetectable. Expression is found in thyrocytes but not in stromal cells (at protein level)..

**Contents** Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

Immunogen A synthesized peptide derived from human Wnt5a

Purification Affinity-chromatography

Storage

Store at -20°C for one year. For short term storage and frequent use, store at 4°C for

up to one month. Avoid repeated freeze-thaw cycles.

## Anti-Wnt5a Rabbit Monoclonal Antibody - Protein Information

Name WNT5A

#### Function

Ligand for members of the frizzled family of seven transmembrane receptors. Can activate or inhibit canonical Wnt signaling, depending on receptor context. In the presence of FZD4, activates beta-catenin signaling. In the presence of ROR2, inhibits the canonical Wnt pathway by promoting beta-catenin degradation through a GSK3-independent pathway which involves down-regulation of beta- catenin-induced reporter gene expression (By similarity). Suppression of the canonical pathway allows chondrogenesis to occur and inhibits tumor formation. Stimulates cell migration. Decreases proliferation, migration, invasiveness and clonogenicity of carcinoma cells and may act as a tumor suppressor (PubMed:<a href="http://www.uniprot.org/citations/15735754" target="\_blank">15735754</a>). Mediates motility of melanoma cells (PubMed:<a href="http://www.uniprot.org/citations/15735754" target="\_blank">17426020</a>). Required during embryogenesis for extension of the primary anterior-posterior axis and for outgrowth of limbs and the genital tubercle. Inhibits type II collagen expression in chondrocytes (By similarity).

#### **Cellular Location**

Secreted, extracellular space, extracellular matrix. Secreted

#### **Tissue Location**

Expression is increased in differentiated thyroid carcinomas compared to normal thyroid tissue and anaplastic thyroid tumors where expression is low or undetectable. Expression is found in thyrocytes but not in stromal cells (at protein level) (PubMed:15735754). Detected in neonate heart and lung (PubMed:8288227)

### Anti-Wnt5a Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>
