href="http://www.uniprot.org/citations/37802024" target="_blank">37802024</a>). Promotes the
recruitment of ubiquitinated cargo proteins to autophagosomes via multiple domains that bridge
proteins and organelles in different steps (PubMed:<a

href="http://www.uniprot.org/citations/37802024" target="blank">37802024</a>). SQSTM1 first
mediates the assembly and removal of ubiquitinated proteins by undergoing liquid-liquid phase
separation upon binding to ubiquitinated proteins via its UBA domain, leading to the formation of
insoluble cytoplasmic inclusions, known as p62 bodies (PubMed: <a
href="http://www.uniprot.org/citations/15911346" target=" blank">15911346</a>, PubMed:<a

SQSTM1 then interacts with ATG8 family proteins on autophagosomes via its LIR motif, leading to p62 body recruitment to autophagosomes, followed by autophagic clearance of ubiquitinated proteins (PubMed:<a href="http://www.uniprot.org/citations/16286508" target=" blank">16286508</a>, PubMed: <a href="http://www.uniprot.org/citations/17580304" target="blank">17580304</a>, PubMed: <a href="http://www.uniprot.org/citations/20168092" target="blank">20168092</a>, PubMed: <a href="http://www.uniprot.org/citations/22622177" target="\_blank">22622177</a>, PubMed:<a href="http://www.uniprot.org/citations/24128730" target="\_blank">24128730</a>, PubMed:<a href="http://www.uniprot.org/citations/28404643" target="blank">28404643</a>, PubMed: <a href="http://www.uniprot.org/citations/37802024" target="blank">37802024</a>). SQSTM1 is itself degraded along with its ubiquitinated cargos (PubMed: <a href="http://www.uniprot.org/citations/16286508" target=" blank">16286508</a>, PubMed:<a href="http://www.uniprot.org/citations/17580304" target="\_blank">17580304</a>, PubMed:<a href="http://www.uniprot.org/citations/37802024" target="blank">37802024</a>). Also required to recruit ubiquitinated proteins to PML bodies in the nucleus (PubMed: <a href="http://www.uniprot.org/citations/20168092" target=" blank">20168092</a>). Also involved in autophagy of peroxisomes (pexophagy) in response to reactive oxygen species (ROS) by acting as a bridge between ubiquitinated PEX5 receptor and autophagosomes (PubMed:<a href="http://www.uniprot.org/citations/26344566" target=" blank">26344566</a>). Acts as an activator of the NFE2L2/NRF2 pathway via interaction with KEAP1: interaction inactivates the BCR(KEAP1) complex by sequestering the complex in inclusion bodies, promoting nuclear accumulation of NFE2L2/NRF2 and subsequent expression of cytoprotective genes (PubMed: <a href="http://www.uniprot.org/citations/20452972" target=" blank">20452972</a>, PubMed:<a href="http://www.uniprot.org/citations/28380357" target="blank">28380357</a>, PubMed:<a href="http://www.uniprot.org/citations/33393215" target="blank">33393215</a>, PubMed:<a href="http://www.uniprot.org/citations/37306101" target=" blank">37306101</a>). Promotes relocalization of 'Lys-63'-linked ubiquitinated STING1 to autophagosomes (PubMed: <a href="http://www.uniprot.org/citations/29496741" target=" blank">29496741</a>). Involved in endosome organization by retaining vesicles in the perinuclear cloud: following ubiquitination by RNF26, attracts specific vesicle-associated adapters, forming a molecular bridge that restrains cognate vesicles in the perinuclear region and organizes the endosomal pathway for efficient cargo transport (PubMed: <a href="http://www.uniprot.org/citations/27368102" target=" blank">27368102</a>, PubMed:<a href="http://www.uniprot.org/citations/33472082" target="\_blank">33472082</a>). Sequesters tensin TNS2 into cytoplasmic puncta, promoting TNS2 ubiquitination and proteasomal degradation (PubMed:<a href="http://www.uniprot.org/citations/25101860" target="\_blank">25101860</a>). May regulate the activation of NFKB1 by TNF-alpha, nerve growth factor (NGF) and interleukin-1 (PubMed: <a href="http://www.uniprot.org/citations/10356400" target=" blank">10356400</a>, PubMed:<a href="http://www.uniprot.org/citations/10747026" target="blank">10747026</a>, PubMed:<a href="http://www.uniprot.org/citations/11244088" target=" blank">11244088</a>, PubMed:<a href="http://www.uniprot.org/citations/12471037" target="\_blank">12471037</a>, PubMed:<a href="http://www.uniprot.org/citations/16079148" target="blank">16079148</a>, PubMed:<a href="http://www.uniprot.org/citations/19931284" target="blank">19931284</a>). May play a role in titin/TTN downstream signaling in muscle cells (PubMed: <a href="http://www.uniprot.org/citations/15802564" target=" blank">15802564</a>). Adapter that mediates the interaction between TRAF6 and CYLD (By similarity).
