

#### **Anti-Emerin Rabbit Monoclonal Antibody**

Catalog # ABO14458

## **Specification**

#### **Anti-Emerin Rabbit Monoclonal Antibody - Product Information**

Application WB, IHC, IF, ICC

Primary Accession
Host
Rabbit
Isotype
Rabbit IgG

Reactivity Rat, Human, Mouse

Clonality Monoclonal Format Liquid

**Description** 

Anti-Emerin Rabbit Monoclonal Antibody . Tested in WB, IHC, ICC/IF applications. This antibody reacts with Human, Mouse, Rat.

## **Anti-Emerin Rabbit Monoclonal Antibody - Additional Information**

**Gene ID 2010** 

**Other Names** 

Emerin, EMD, EDMD, STA

**Application Details** 

WB 1:500-1:2000<br > IHC 1:50-1:200<br > ICC/IF 1:50-1:200

Contents

Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

**Immunogen** 

A synthesized peptide derived from human Emerin

**Purification** 

Affinity-chromatography

Storage Store at -20°C for one year. For short term

storage and frequent use, store at 4°C for

up to one month. Avoid repeated

freeze-thaw cycles.

## **Anti-Emerin Rabbit Monoclonal Antibody - Protein Information**

**Name EMD** 

Synonyms EDMD, STA

**Function** 

Stabilizes and promotes the formation of a nuclear actin cortical network. Stimulates actin polymerization in vitro by binding and stabilizing the pointed end of growing filaments. Inhibits beta- catenin activity by preventing its accumulation in the nucleus. Acts by influencing the nuclear accumulation of beta-catenin through a CRM1- dependent export pathway. Links centrosomes to the nuclear envelope via a microtubule association. Required for proper localization of non- farnesylated prelamin-A/C. Together with NEMP1, contributes to nuclear envelope stiffness in germ cells (PubMed:<a href="http://www.uniprot.org/citations/32923640" target="\_blank">32923640</a>). EMD and BAF are cooperative cofactors of HIV-1 infection. Association of EMD with the viral DNA requires the presence of BAF and viral integrase. The association of viral DNA with chromatin requires the presence of BAF and EMD.

#### **Cellular Location**

Nucleus inner membrane; Single-pass membrane protein; Nucleoplasmic side. Nucleus outer membrane. Note=Colocalized with BANF1 at the central region of the assembling nuclear rim, near spindle-attachment sites. The accumulation of different intermediates of prelamin-A/C (non-farnesylated or carboxymethylated farnesylated prelamin-A/C) in fibroblasts modify its localization in the nucleus

#### **Tissue Location**

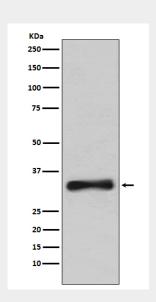

Skeletal muscle, heart, colon, testis, ovary and pancreas

#### **Anti-Emerin Rabbit Monoclonal Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **Anti-Emerin Rabbit Monoclonal Antibody - Images**

Western blot analysis of Emerin expression in 293T cell lysate.
