

**Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12)**  
**Catalog # ABO15099****Specification****Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) - Product Information**

Application	WB, IHC, FC
Primary Accession	<a href="#">Q96J02</a>
Host	Mouse
Isotype	Mouse IgG2b
Reactivity	Rat, Human, Mouse
Clonality	Monoclonal
Format	Lyophilized

**Description**

Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) . Tested in FCM, IHC, WB applications. This antibody reacts with Human, Mouse, Rat.

**Reconstitution**

Adding 0.2 ml of distilled water will yield a concentration of 500 µg/ml.

**Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) - Additional Information**

**Gene ID** 83737

**Other Names**

E3 ubiquitin-protein ligase Itchy homolog, Itch, 2.3.2.26, Atrophin-1-interacting protein 4, AIP4, HECT-type E3 ubiquitin transferase Itchy homolog, NFE2-associated polypeptide 1, NAPP1, ITCH

**Calculated MW**

103 kDa KDa

**Application Details**

Western blot, 0.25-0.5 µg/ml, Human, Mouse, Rat<br> Immunohistochemistry(Paraffin-embedded Section), 2-5 µg/ml, Human<br> Flow Cytometry, 1-3 µg/1x<sup>6</sup> cells, Human<br>

**Contents**

Each vial contains 4 mg Trehalose, 0.9 mg NaCl and 0.2 mg Na<sub>2</sub>HPO<sub>4</sub>.

**Immunogen**

E.coli-derived human ITCH/AIP4 recombinant protein (Position: K17-E358).

**Purification**

Immunogen affinity purified.

**Storage**

**At -20°C for one year from date of receipt.  
After reconstitution, at 4°C for one month.  
It can also be aliquotted and stored frozen  
at -20°C for six months. Avoid repeated  
freezing and thawing.**

**Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) - Protein Information****Name** ITCH**Function**

Acts as an E3 ubiquitin-protein ligase which accepts ubiquitin from an E2 ubiquitin-conjugating enzyme in the form of a thioester and then directly transfers the ubiquitin to targeted substrates (PubMed: <a href="http://www.uniprot.org/citations/11046148" target="\_blank">11046148</a>, PubMed: <a href="http://www.uniprot.org/citations/14602072" target="\_blank">14602072</a>, PubMed: <a href="http://www.uniprot.org/citations/15051726" target="\_blank">15051726</a>, PubMed: <a href="http://www.uniprot.org/citations/16387660" target="\_blank">16387660</a>, PubMed: <a href="http://www.uniprot.org/citations/17028573" target="\_blank">17028573</a>, PubMed: <a href="http://www.uniprot.org/citations/18718448" target="\_blank">18718448</a>, PubMed: <a href="http://www.uniprot.org/citations/18718449" target="\_blank">18718449</a>, PubMed: <a href="http://www.uniprot.org/citations/19116316" target="\_blank">19116316</a>, PubMed: <a href="http://www.uniprot.org/citations/19592251" target="\_blank">19592251</a>, PubMed: <a href="http://www.uniprot.org/citations/19881509" target="\_blank">19881509</a>, PubMed: <a href="http://www.uniprot.org/citations/20068034" target="\_blank">20068034</a>, PubMed: <a href="http://www.uniprot.org/citations/20392206" target="\_blank">20392206</a>, PubMed: <a href="http://www.uniprot.org/citations/20491914" target="\_blank">20491914</a>, PubMed: <a href="http://www.uniprot.org/citations/23146885" target="\_blank">23146885</a>, PubMed: <a href="http://www.uniprot.org/citations/24790097" target="\_blank">24790097</a>, PubMed: <a href="http://www.uniprot.org/citations/25631046" target="\_blank">25631046</a>). Catalyzes 'Lys-29', 'Lys-48' and 'Lys-63'-linked ubiquitin conjugation (PubMed: <a href="http://www.uniprot.org/citations/17028573" target="\_blank">17028573</a>, PubMed: <a href="http://www.uniprot.org/citations/18718448" target="\_blank">18718448</a>, PubMed: <a href="http://www.uniprot.org/citations/19131965" target="\_blank">19131965</a>, PubMed: <a href="http://www.uniprot.org/citations/19881509" target="\_blank">19881509</a>). Involved in the control of inflammatory signaling pathways (PubMed: <a href="http://www.uniprot.org/citations/19131965" target="\_blank">19131965</a>). Essential component of a ubiquitin-editing protein complex, comprising also TNFAIP3, TAX1BP1 and RNF11, that ensures the transient nature of inflammatory signaling pathways (PubMed: <a href="http://www.uniprot.org/citations/19131965" target="\_blank">19131965</a>). Promotes the association of the complex after TNF stimulation (PubMed: <a href="http://www.uniprot.org/citations/19131965" target="\_blank">19131965</a>). Once the complex is formed, TNFAIP3 deubiquitinates 'Lys-63' polyubiquitin chains on RIPK1 and catalyzes the formation of 'Lys-48'-polyubiquitin chains (PubMed: <a href="http://www.uniprot.org/citations/19131965" target="\_blank">19131965</a>). This leads to RIPK1 proteasomal degradation and consequently termination of the TNF- or LPS-mediated activation of NFKB1 (PubMed: <a href="http://www.uniprot.org/citations/19131965" target="\_blank">19131965</a>). Ubiquitinates RIPK2 by 'Lys-63'-linked conjugation and influences NOD2-dependent signal transduction pathways (PubMed: <a href="http://www.uniprot.org/citations/19592251" target="\_blank">19592251</a>). Regulates the transcriptional activity of several transcription factors, and probably plays an important role in the regulation of immune response (PubMed: <a href="http://www.uniprot.org/citations/18718448" target="\_blank">18718448</a>, PubMed: <a href="http://www.uniprot.org/citations/20491914" target="\_blank">20491914</a>). Ubiquitinates NFE2 by 'Lys-63' linkages and is implicated in the control of the development of hematopoietic lineages (PubMed: <a href="http://www.uniprot.org/citations/18718448" target="\_blank">18718448</a>). Mediates JUN ubiquitination and degradation (By similarity). Mediates JUNB ubiquitination and degradation (PubMed: <a href="http://www.uniprot.org/citations/16387660" target="\_blank">16387660</a>). Critical regulator of type 2 helper T (Th2) cell cytokine production by inducing JUNB ubiquitination and degradation (By similarity). Involved in the negative regulation of MAVS-dependent cellular antiviral responses (PubMed: <a href="http://www.uniprot.org/citations/19881509" target="\_blank">19881509</a>). Ubiquitinates MAVS through 'Lys-48'-linked conjugation resulting in MAVS proteasomal degradation (PubMed: <a href="http://www.uniprot.org/citations/19881509" target="\_blank">19881509</a>). Following

ligand stimulation, regulates sorting of Wnt receptor FZD4 to the degradative endocytic pathway probably by modulating PI42KA activity (PubMed:<a href="http://www.uniprot.org/citations/23146885" target="\_blank">23146885</a>). Ubiquitinates PI4K2A and negatively regulates its catalytic activity (PubMed:<a href="http://www.uniprot.org/citations/23146885" target="\_blank">23146885</a>). Ubiquitinates chemokine receptor CXCR4 and regulates sorting of CXCR4 to the degradative endocytic pathway following ligand stimulation by ubiquitinating endosomal sorting complex required for transport ESCRT-0 components HGS and STAM (PubMed:<a href="http://www.uniprot.org/citations/14602072" target="\_blank">14602072</a>, PubMed:<a href="http://www.uniprot.org/citations/23146885" target="\_blank">23146885</a>, PubMed:<a href="http://www.uniprot.org/citations/34927784" target="\_blank">34927784</a>). Targets DTX1 for lysosomal degradation and controls NOTCH1 degradation, in the absence of ligand, through 'Lys-29'-linked polyubiquitination (PubMed:<a href="http://www.uniprot.org/citations/17028573" target="\_blank">17028573</a>, PubMed:<a href="http://www.uniprot.org/citations/18628966" target="\_blank">18628966</a>, PubMed:<a href="http://www.uniprot.org/citations/23886940" target="\_blank">23886940</a>). Ubiquitinates SNX9 (PubMed:<a href="http://www.uniprot.org/citations/20491914" target="\_blank">20491914</a>). Ubiquitinates MAP3K7 through 'Lys-48'-linked conjugation (By similarity). Together with UBR5, involved in the regulation of apoptosis and reactive oxygen species levels through the ubiquitination and proteasomal degradation of TXNIP: catalyzes 'Lys-48'-'Lys-63'-branched ubiquitination of TXNIP (PubMed:<a href="http://www.uniprot.org/citations/20068034" target="\_blank">20068034</a>, PubMed:<a href="http://www.uniprot.org/citations/29378950" target="\_blank">29378950</a>). ITCH synthesizes 'Lys-63'-linked chains, while UBR5 is branching multiple 'Lys-48'-linked chains of substrate initially modified (PubMed:<a href="http://www.uniprot.org/citations/29378950" target="\_blank">29378950</a>). Mediates the antiapoptotic activity of epidermal growth factor through the ubiquitination and proteasomal degradation of p15 BID (PubMed:<a href="http://www.uniprot.org/citations/20392206" target="\_blank">20392206</a>). Ubiquitinates BRAT1 and this ubiquitination is enhanced in the presence of NDFIP1 (PubMed:<a href="http://www.uniprot.org/citations/25631046" target="\_blank">25631046</a>). Inhibits the replication of influenza A virus (IAV) via ubiquitination of IAV matrix protein 1 (M1) through 'Lys-48'-linked conjugation resulting in M1 proteasomal degradation (PubMed:<a href="http://www.uniprot.org/citations/30328013" target="\_blank">30328013</a>). Ubiquitinates NEDD9/HEF1, resulting in proteasomal degradation of NEDD9/HEF1 (PubMed:<a href="http://www.uniprot.org/citations/15051726" target="\_blank">15051726</a>).

### Cellular Location

Cell membrane; Peripheral membrane protein; Cytoplasmic side. Cytoplasm. Nucleus Early endosome membrane; Peripheral membrane protein; Cytoplasmic side. Endosome membrane; Peripheral membrane protein; Cytoplasmic side. Note=May be recruited to exosomes by NDFIP1 (PubMed:18819914). Localizes to plasma membrane upon CXCL12 stimulation where it co-localizes with CXCL4 (PubMed:14602072) Localization to early endosomes is increased upon CXCL12 stimulation where it co-localizes with DTX3L and CXCL4 (PubMed:24790097)

### Tissue Location

Widely expressed.

## Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) - Protocols

Provided below are standard protocols that you may find useful for product applications.

### Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) - Images

Figure 1. Western blot analysis of ITCH/AIP4 using anti-ITCH/AIP4 antibody (M00195-1). Electrophoresis was performed on a 5-20% SDS-PAGE gel at 70V (Stacking gel) / 90V (Resolving gel) for 2-3 hours. The sample well of each lane was loaded with 30 ug of sample under reducing conditions.

Lane 1: human HepG2 whole cell lysates,  
Lane 2: human 293T whole cell lysates,  
Lane 3: human PC-3 whole cell lysates,  
Lane 4: rat brain tissue lysates,  
Lane 5: mouse brain tissue lysates.

After electrophoresis, proteins were transferred to a nitrocellulose membrane at 150 mA for 50-90 minutes. Blocked the membrane with 5% non-fat milk/TBS for 1.5 hour at RT. The membrane was incubated with mouse anti-ITCH/AIP4 antigen affinity purified monoclonal antibody (Catalog # M00195-1) at 0.5 µg/mL overnight at 4°C, then washed with TBS-0.1%Tween 3 times with 5 minutes each and probed with a goat anti-mouse IgG-HRP secondary antibody at a dilution of 1:10000 for 1.5 hour at RT. The signal is developed using an Enhanced Chemiluminescent detection (ECL) kit (Catalog # EK1001) with Tanon 5200 system. A specific band was detected for ITCH/AIP4 at approximately 103 kDa. The expected band size for ITCH/AIP4 is at 103 kDa.

Figure 2. IHC analysis of ITCH/AIP4 using anti-ITCH/AIP4 antibody (M00195-1). ITCH/AIP4 was detected in a paraffin-embedded section of human renal clear cell carcinoma tissue. Heat mediated antigen retrieval was performed in EDTA buffer (pH 8.0, epitope retrieval

solution). The tissue section was blocked with 10% goat serum. The tissue section was then incubated with 2  $\mu$ g/ml mouse anti-ITCH/AIP4 Antibody (M00195-1) overnight at 4°C. Biotinylated goat anti-mouse IgG was used as secondary antibody and incubated for 30 minutes at 37°C. The tissue section was developed using Streptavidin-Biotin-Complex (SABC) (Catalog # SA1021) with DAB as the chromogen.

Figure 3. IHC analysis of ITCH/AIP4 using anti-ITCH/AIP4 antibody (M00195-1).

ITCH/AIP4 was detected in a paraffin-embedded section of human breast cancer tissue. Heat mediated antigen retrieval was performed in EDTA buffer (pH 8.0, epitope retrieval solution). The tissue section was blocked with 10% goat serum. The tissue section was then incubated with 2  $\mu$ g/ml mouse anti-ITCH/AIP4 Antibody (M00195-1) overnight at 4°C. Biotinylated goat anti-mouse IgG was used as secondary antibody and incubated for 30 minutes at 37°C. The tissue section was developed using Streptavidin-Biotin-Complex (SABC) (Catalog # SA1021) with DAB as the chromogen.

Figure 4. IHC analysis of ITCH/AIP4 using anti-ITCH/AIP4 antibody (M00195-1).

ITCH/AIP4 was detected in a paraffin-embedded section of human liver cancer tissue. Heat mediated antigen retrieval was performed in EDTA buffer (pH 8.0, epitope retrieval solution). The tissue section was blocked with 10% goat serum. The tissue section was then incubated with 2  $\mu$ g/ml mouse anti-ITCH/AIP4 Antibody (M00195-1) overnight at 4°C. Biotinylated goat anti-mouse IgG was used as secondary antibody and incubated for 30 minutes at 37°C. The tissue section was developed using Streptavidin-Biotin-Complex (SABC) (Catalog # SA1021) with DAB as the chromogen.

Figure 5. Flow Cytometry analysis of U937 cells using anti-ITCH/AIP4 antibody (M00195-1). Overlay histogram showing U937 cells stained with M00195-1 (Blue line). The cells were blocked with 10% normal goat serum. And then incubated with mouse anti-ITCH/AIP4 Antibody (M00195-1, 1 µg/1x10<sup>6</sup> cells) for 30 min at 20°C. DyLight®488 conjugated goat anti-mouse IgG (BA1126, 5-10 µg/1x10<sup>6</sup> cells) was used as secondary antibody for 30 minutes at 20°C. Isotype control antibody (Green line) was mouse IgG (1 µg/1x10<sup>6</sup>) used under the same conditions. Unlabelled sample (Red line) was also used as a control.

### Anti-ITCH/AIP4 Antibody Picoband™ (monoclonal, 5E12) - Background

ITCH is an ubiquitin-conjugating enzyme. This gene encodes a member of the Nedd4 family of HECT domain E3 ubiquitin ligases. HECT domain E3 ubiquitin ligases transfer ubiquitin from E2 ubiquitin-conjugating enzymes to protein substrates, thus targeting specific proteins for lysosomal degradation. The encoded protein plays a role in multiple cellular processes including erythroid and lymphoid cell differentiation and the regulation of immune responses. Mutations in this gene are a cause of syndromic multisystem autoimmune disease. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene.
