Anti-Placental Protein 14 / PAEP Rabbit Monoclonal Antibody

Catalog # ABO15590

Specification

Anti-Placental Protein 14 / PAEP Rabbit Monoclonal Antibody - Product Information

Application	**WB**
Primary Accession	P09466
Host	**Rabbit**
Isotype	**IgG**
Reactivity	**Human**
Clonality	**Monoclonal**
Format	**Liquid**

Description
Anti-Placental Protein 14 / PAEP Rabbit Monoclonal Antibody . Tested in WB application. This antibody reacts with Human.

Anti-Placental Protein 14 / PAEP Rabbit Monoclonal Antibody - Additional Information

Gene ID 5047

Other Names
Glycodelin, GD, Placental protein 14, PP14, Pregnancy-associated endometrial alpha-2 globulin, PAEG, PEG, Progestagen-associated endometrial protein, Progesterone-associated endometrial protein, Zona-binding inhibitory factor-1, ZIF-1, PAEP

Calculated MW
24 kDa KDa

Application Details
WB 1:500-1:2000

Contents
Rabbit IgG in phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol, 0.4-0.5mg/ml BSA.

Immunogen
A synthesized peptide derived from human Placental Protein 14 / PAEP

Purification
Affinity-chromatography

Storage	**Store at -20°C for one year. For short term storage and frequent use, store at 4°C for up to one month. Avoid repeated freeze-thaw cycles.**

Anti-Placental Protein 14 / PAEP Rabbit Monoclonal Antibody - Protein Information

Name PAEP

Function
Glycoprotein that regulates critical steps during fertilization and also has immunomonomodulatory effects. Four glycoforms, namely glycodelin-S, -A, -F and -C have been identified in reproductive tissues that differ in glycosylation and biological activity. Glycodelin-A has contraceptive and immunosuppressive activities (PubMed:7531163, PubMed:9918684). Glycodelin-C stimulates binding of spermatozoa to the zona pellucida (PubMed:17192260). Glycodelin-F inhibits spermatozoa-zona pellucida binding and significantly suppresses progesterone-induced acrosome reaction of spermatozoa (PubMed:12672671). Glycodelin-S in seminal plasma maintains the uncapacitated state of human spermatozoa (PubMed:15883155).

Cellular Location
Secreted

Tissue Location
This protein is, the main protein synthesized and secreted in the endometrium from mid-luteal phase of the menstrual cycle and during the first semester of pregnancy (PubMed:3667877) Glycodelin-A is expressed in amniotic fluid, endometrium/decidua and maternal serum (at protein level) (PubMed:3194393). Glycodelin-F is expressed in follicular fluid, luteinized granulosa cells and the oviduct (at protein level) (PubMed:12672671). Glycodelin-S is expressed in seminal plasma and seminal vesicles (at protein level) (PubMed:9239694). Glycodelin-C is detected in cumulus cells (at protein level), but cumulus cells do not synthesize Glycodelin-C but take up and convert glycodelin-A and -F vis glycan remodeling (PubMed:17192260).

Anti-Placental Protein 14 / PAEP Rabbit Monoclonal Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
