

NAIP Antibody

Rabbit Polyclonal Antibody Catalog # ABV10181

Specification

NAIP Antibody - Product Information

Application WB
Primary Accession Q13075
Reactivity Human
Host Rabbit
Clonality Polyclonal
Isotype Rabbit IgG
Calculated MW 159582

NAIP Antibody - Additional Information

Gene ID 4671

Application & Usage

The antibody detects recombinant human NAIP in extracts from Sf21 insect cells by Western blot analysis (0.5-4 μ g/ml).

Other Names

NAIP, BIRC1, NLRB1, FLJ42520, psiNAIP

Target/Specificity

NAIP

Antibody Form

Liquid

Appearance

Colorless liquid

Formulation

 $100 \mu g$ (0.2 mg/ml) affinity-purified rabbit anti-NAIP polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

Handling

The antibody solution should be gently mixed before use.

Reconstitution & Storage

-20 °C

Background Descriptions

Precautions

NAIP Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

NAIP Antibody - Protein Information

Name NAIP

Synonyms BIRC1

Function

Anti-apoptotic protein which acts by inhibiting the activities of CASP3, CASP7 and CASP9. Can inhibit the autocleavage of pro-CASP9 and cleavage of pro-CASP3 by CASP9. Capable of inhibiting CASP9 autoproteolysis at 'Asp-315' and decreasing the rate of auto proteolysis at 'Asp-330'. Acts as a mediator of neuronal survival in pathological conditions. Prevents motor-neuron apoptosis induced by a variety of signals. Possible role in the prevention of spinal muscular atrophy that seems to be caused by inappropriate persistence of motor- neuron apoptosis: mutated or deleted forms of NAIP have been found in individuals with severe spinal muscular atrophy.

Tissue Location

Expressed in motor neurons, but not in sensory neurons. Found in liver and placenta, and to a lesser extent in spinal cord

NAIP Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

NAIP Antibody - Background

NAIP (neuronal apoptosis inhibitor protein) is a member of the IAPs (inhibitor of apoptosis proteins) that function in cell death pathways to inhibit apoptosis. NAIP was discovered based on its association with a neurodegenerative disorder. Mutations and deletions in the NAIP gene locus is a contributing factor in spinal muscular atrophy. Coexpression of NAIP and hippocalcin protects neurons against calcium-induced cell death. NAIP is strongly expressed in anterior horn and motor cortex neurons of the normal brain. It is also found in human fetal neurons and in adult choroid plexus cells.
