

Phospho-p70 S6 Kinase Antibody

Rabbit Polyclonal Antibody Catalog # ABV10374

#### Specification

## Phospho-p70 S6 Kinase Antibody - Product Information

Application Primary Accession Reactivity Host Clonality Isotype Calculated MW WB <u>O9UBS0</u> Human, Mouse, Rat Rabbit Polyclonal Rabbit IgG 53455

#### Phospho-p70 S6 Kinase Antibody - Additional Information

Gene ID 6199

Application & Usage

Western blotting (0.5-4 µg/ml). However, the optimal conditions should be determined individually. The antibody detects p70 S6 kinase only when phosphorylated at Thr389.

**Other Names** 

RPS6KB1, p70S6k, p70, S6K, p70(S6K)-alpha, P70S6K, p70(S6K)-alpha, p70-alpha, Ribosomal protein S6 kinase beta-2; S6K-beta-2; S6K2; 70 kDa ribosomal protein S6 kinase 2; p70-S6K 2; P70S6K2; p70 ribosomal S6 kinase beta; p70 S6 kinase beta; p70 S6K-beta; p70 S6KB; S6K-beta; p70-beta; S6 kinase-related kinase; SRK; Serine/threonine-protein kinase 14B

Target/Specificity Phospho-p70 S6 Kinase

Antibody Form Liquid

Appearance Colorless liquid

**Formulation** 100 μg (0.5 mg/ml) affinity purified rabbit anti-Phospho-S6 (Thr389) polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

Handling The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

**Background Descriptions** 

#### Precautions

Phospho-p70 S6 Kinase Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## Phospho-p70 S6 Kinase Antibody - Protein Information

Name RPS6KB2

Synonyms STK14B

Function

Phosphorylates specifically ribosomal protein S6 (PubMed:<a href="http://www.uniprot.org/citations/29750193" target="\_blank">29750193</a>). Seems to act downstream of mTOR signaling in response to growth factors and nutrients to promote cell proliferation, cell growth and cell cycle progression in an alternative pathway regulated by MEAK7 (PubMed:<a href="http://www.uniprot.org/citations/29750193" target="\_blank">29750193</a>).

**Cellular Location** Cytoplasm. Nucleus.

# Phospho-p70 S6 Kinase Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- <u>Blocking Peptides</u>
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- <u>Cell Culture</u>

## Phospho-p70 S6 Kinase Antibody - Images

# Phospho-p70 S6 Kinase Antibody - Background

p70 S6 kinase is a mitogen activated Ser/Thr protein kinase that is required for cell growth and G1 cell cycle progression. P70 S6 kinase phosphorylates the S6 protein of the 40S ribosomal subunit and is involved in translational control of 5'oligopyrimidine tract mRNAs. A second isoform, p85 S6 kinase, is derived from the same gene and is identical to p70 S6 kinase except for 23 extra residues at the N-terminus that encode a nuclear localizing signal. Both isoforms lie on a mitogen-activated signaling pathway downstream of phosphoinositide 3 kinase (PI3K) and the target of rapamycin FRAP/mTOR, and distinct from the Ras/MAP kinase cascade.
