

### **USP7 Antibody**

Rabbit Polyclonal Antibody Catalog # ABV10570

## **Specification**

### **USP7 Antibody - Product Information**

Application
Primary Accession
Other Accession
Reactivity
Host
Clonality
Isotype

WB
093009
NP\_003461.1
Human, Mouse, Chicken
Rabbit
Polyclonal
Rabbit IgG
128302

### **USP7 Antibody - Additional Information**

**Gene ID 7874** 

Calculated MW

Application & Usage

Western blotting (1:500 - 1:2000). However, the optimal concentrations should be determined individually. The antibody recognizes USP7 of human origin. HeLa cell nuclear extract can be used as a positive control. Based on sequence homology, the antibody should also react with mouse and chick samples.

#### **Other Names**

USP7, ubiquitin specific processing protease 7; HAUSP, Herpes virus-associated ubiquitin-specific protease; Deubiquitinating enzyme 7; Ubiquitin thiolesterase 7; Ubiquitin carboxyl-terminal hydrolase 7; TEF1

Target/Specificity USP7

**Antibody Form** Liquid

**Appearance** Colorless liquid

# Formulation

 $100~\mu l$  affinity purified rabbit polyclonal antibody in phosphate-buffered saline (PBS) containing 30% glycerol, 0.5% BSA and 0.01% thimerosal.

### **Handling**

The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

### **Background Descriptions**

#### **Precautions**

USP7 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### **USP7 Antibody - Protein Information**

Name USP7 {ECO:0000303|PubMed:12093161, ECO:0000312|HGNC:HGNC:12630}

#### **Function**

```
Hydrolase that deubiquitinates target proteins such as FOXO4, DEPTOR, KAT5, p53/TP53, MDM2,
ERCC6, DNMT1, UHRF1, PTEN, KMT2E/MLL5 and DAXX (PubMed:<a
href="http://www.uniprot.org/citations/11923872" target=" blank">11923872</a>, PubMed:<a
href="http://www.uniprot.org/citations/15053880" target="blank">15053880</a>, PubMed:<a
href="http://www.uniprot.org/citations/16964248" target="blank">16964248</a>, PubMed:<a
href="http://www.uniprot.org/citations/18716620" target="_blank">18716620</a>, PubMed:<a href="http://www.uniprot.org/citations/25283148" target="_blank">25283148</a>, PubMed:<a
href="http://www.uniprot.org/citations/25865756" target="blank">25865756</a>, PubMed:<a
href="http://www.uniprot.org/citations/26678539" target="blank">26678539</a>, PubMed:<a
href="http://www.uniprot.org/citations/28655758" target="_blank">28655758</a>, PubMed:<a
href="http://www.uniprot.org/citations/35216969" target="_blank">35216969</a>). Together
with DAXX, prevents MDM2 self-ubiquitination and enhances the E3 ligase activity of MDM2
towards p53/TP53, thereby promoting p53/TP53 ubiquitination and proteasomal degradation
(PubMed:<a href="http://www.uniprot.org/citations/15053880" target="_blank">15053880</a>,
PubMed: <a href="http://www.uniprot.org/citations/16845383" target=" blank">16845383</a>,
PubMed:<a href="http://www.uniprot.org/citations/18566590" target="blank">18566590</a>,
PubMed: <a href="http://www.uniprot.org/citations/20153724" target="blank">20153724</a>).
Deubiquitinates p53/TP53, preventing degradation of p53/TP53, and enhances
p53/TP53-dependent transcription regulation, cell growth repression and apoptosis (PubMed:<a
href="http://www.uniprot.org/citations/25283148" target="_blank">25283148</a>).
Deubiquitinates p53/TP53 and MDM2 and strongly stabilizes p53/TP53 even in the presence of
excess MDM2, and also induces p53/TP53-dependent cell growth repression and apoptosis
(PubMed:<a href="http://www.uniprot.org/citations/11923872" target="_blank">11923872</a>,
PubMed:<a href="http://www.uniprot.org/citations/26786098" target=" blank">26786098</a>).
Deubiquitination of FOXO4 in presence of hydrogen peroxide is not dependent on p53/TP53 and
inhibits FOXO4-induced transcriptional activity (PubMed: <a
href="http://www.uniprot.org/citations/16964248" target=" blank">16964248</a>). In
association with DAXX, is involved in the deubiquitination and translocation of PTEN from the
nucleus to the cytoplasm, both processes that are counteracted by PML (PubMed: <a
href="http://www.uniprot.org/citations/18716620" target=" blank">18716620</a>).
Deubiquitinates KMT2E/MLL5 preventing KMT2E/MLL5 proteasomal-mediated degradation
(PubMed:<a href="http://www.uniprot.org/citations/26678539" target=" blank">26678539</a>).
Involved in cell proliferation during early embryonic development. Involved in
transcription-coupled nucleotide excision repair (TC-NER) in response to UV damage: recruited to
DNA damage sites following interaction with KIAA1530/UVSSA and promotes deubiquitination of
ERCC6, preventing UV- induced degradation of ERCC6 (PubMed: <a
href="http://www.uniprot.org/citations/22466611" target=" blank">22466611</a>, PubMed:<a
href="http://www.uniprot.org/citations/22466612" target="blank">22466612</a>). Involved in
maintenance of DNA methylation via its interaction with UHRF1 and DNMT1: acts by mediating
deubiquitination of UHRF1 and DNMT1, preventing their degradation and promoting DNA
methylation by DNMT1 (PubMed: <a href="http://www.uniprot.org/citations/21745816"
```

target="\_blank">21745816</a>, PubMed:<a href="http://www.uniprot.org/citations/22411829" target="\_blank">22411829</a>). Deubiquitinates alkylation repair enzyme ALKBH3. OTUD4 recruits USP7 and USP9X to stabilize ALKBH3, thereby promoting the repair of alkylated DNA lesions (PubMed:<a href="http://www.uniprot.org/citations/25944111"

target="\_blank">25944111</a>). Acts as a chromatin regulator via its association with the Polycomb group (PcG) multiprotein PRC1-like complex; may act by deubiquitinating components of the PRC1-like complex (PubMed:<a href="http://www.uniprot.org/citations/20601937"

target="\_blank">20601937</a>). Able to mediate deubiquitination of histone H2B; it is however unsure whether this activity takes place in vivo (PubMed:<a

href="http://www.uniprot.org/citations/20601937" target="\_blank">20601937</a>). Exhibits a preference towards 'Lys-48'-linked ubiquitin chains (PubMed:<a

href="http://www.uniprot.org/citations/22689415" target="\_blank">22689415</a>). Increases regulatory T-cells (Treg) suppressive capacity by deubiquitinating and stabilizing the transcription factor FOXP3 which is crucial for Treg cell function (PubMed:<a

href="http://www.uniprot.org/citations/23973222" target="\_blank">23973222</a>). Plays a role in the maintenance of the circadian clock periodicity via deubiquitination and stabilization of the CRY1 and CRY2 proteins (PubMed:<a href="http://www.uniprot.org/citations/27123980" target="blank">27123980</a>). Deubiquitinates REST, thereby stabilizing REST and promoting

the maintenance of neural progenitor cells (PubMed:<a

href="http://www.uniprot.org/citations/21258371" target="\_blank">21258371</a>). Deubiquitinates SIRT7, inhibiting SIRT7 histone deacetylase activity and regulating gluconeogenesis (PubMed:<a href="http://www.uniprot.org/citations/28655758" target="\_blank">28655758</a>). Involved in the regulation of WASH-dependent actin polymerization at the surface of endosomes and the regulation of endosomal protein recycling (PubMed:<a href="http://www.uniprot.org/citations/26365382" target="\_blank">26365382</a>). It maintains optimal WASH complex activity and precise F-actin levels via deubiquitination of TRIM27 and WASHC1 (PubMed:<a href="http://www.uniprot.org/citations/26365382" target="\_blank">26365382" target="\_blank">26365382</a>). Mediates the deubiquitination of phosphorylated DEPTOR, promoting its stability and leading to decreased mTORC1 signaling (PubMed:<a href="http://www.uniprot.org/citations/35216969" target="\_blank">35216969</a>/a>).

### **Cellular Location**

Nucleus. Cytoplasm Nucleus, PML body. Chromosome. Note=Present in a minority of ND10 nuclear bodies. Association with ICP0/VMW110 at early times of infection leads to an increased proportion of USP7-containing ND10 Colocalizes with ATXN1 in the nucleus. Colocalized with DAXX in speckled structures. Colocalized with PML and PTEN in promyelocytic leukemia protein (PML) nuclear bodies

### **Tissue Location**

Expressed in neural progenitor cells (at protein level) (PubMed:21258371). Widely expressed. Overexpressed in prostate cancer.

### **USP7 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# **USP7 Antibody - Background**

Ubiquitin (Ub) is a highly conserved protein found ubiquitously in eukaryotic organisms. The conjugation of ubiquitin to proteins is an important means to regulate protein activity for many cellular processes by tagging them for degradation. Removal of Ub can rescue proteins from degradation. This is accomplished by the ubiquitin-specific processing protease (UBP) family of enzymes. Ubiquitin specific processing protease 7 (USP7) is a member of this family that has been shown to interact and stabilize p53.
