Polyclonal
Rabbit IgG

DMP1 Antibody - Additional Information

Application & Usage

Western blotting (0.5-4 μ g/ml). However, the optimal conditions should be determined individually. The antibody recognizes ~60-130 kDa DMP- 1 of human, mouse, and rat origins. Reactivity to other species has not been tested.

Other Names DMP-1, DMP 1

Target/Specificity DMP1

Antibody Form Liquid

Appearance Colorless liquid

Formulation

 $100 \mu g$ (0.5 mg/ml) affinity purified rabbit anti-DMP-1 polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol, 0.5% BSA, 0.01% thimerosal.

Handling

The antibody solution should be gently mixed before use.

Reconstitution & Storage -20 °C

Background Descriptions

Precautions

DMP1 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

DMP1 Antibody - Protein Information

DMP1 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

DMP1 Antibody - Background

DMP-1 (Dentin matrix protein1) is a member of the integrin ligand N-linked glycoprotein family. It is mostly found in bone, tooth and hypertrophic cartilage. DMP-1 plays an important role in dentin and bone mineralization. DMP-1 has multiple serine, glutamic acid and aspartic acid residues, a GAG attachement site and RGD motif. DMP-1 is proteolytically proceeded into mulitple fragements in the extracellular matrix (ECM) of bone and dentin.
