

ApoD Antibody (NT)
Rabbit Polyclonal Antibody
Catalog # ABV11269**Specification**

ApoD Antibody (NT) - Product Information

Application	WB
Primary Accession	P05090
Reactivity	Human, Mouse
Host	Rabbit
Clonality	Polyclonal
Isotype	Rabbit IgG
Calculated MW	21276

ApoD Antibody (NT) - Additional Information**Gene ID** 347

Positive Control	Western blot: 293 cell line lysate and mouse brain tissue lysate
Application & Usage	Western blot: ~1:1000.
Other Names	
APOD; Apolipoprotein D	

Target/Specificity
ApoD**Antibody Form**
Liquid**Appearance**
Colorless liquid**Formulation**
100 µl of antibody in PBS with 0.09% (W/V) sodium azide**Handling**
The antibody solution should be gently mixed before use.**Reconstitution & Storage**
-20 °C**Background Descriptions****Precautions**

ApoD Antibody (NT) is for research use only and not for use in diagnostic or therapeutic procedures.

ApoD Antibody (NT) - Protein Information

Name APOD

Function

APOD occurs in the macromolecular complex with lecithin- cholesterol acyltransferase. It is probably involved in the transport and binding of bilin. Appears to be able to transport a variety of ligands in a number of different contexts.

Cellular Location

Secreted.

Tissue Location

Expressed in liver, intestine, pancreas, kidney, placenta, adrenal, spleen, fetal brain tissue and tears

ApoD Antibody (NT) - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

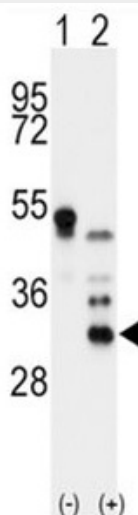

ApoD Antibody (NT) - Images

Western blot analysis in 293 cell line lysates (35 µg/lane). APOD (arrow) was detected using the purified pAb.

Western blot analysis in mouse brain tissue lysates (35 µg/lane). APOD (arrow) was detected using the purified pAb.

Western blot analysis with 293 cell lysates (2 µg/lane) either nontransfected (Lane 1) or transiently transfected with the APOD gene (Lane 2)

ApoD Antibody (NT) - Background

Apolipoproteins are plasma lipoproteins that function as transporters of lipids and cholesterol in the circulatory system. Apolipoprotein-D (Apo-D) is mainly associated with high density lipoproteins in human plasma. It is expressed in numerous tissues having high levels of expression in spleen, testes and brain. Apo-D is a multi-ligand, multi-functional transporter and transports a ligand from 1 cell to another within an organ, scavenge a ligand within an organ for transport to the blood or could transport a ligand from the circulation to specific cells within a tissue.
