

### **Prolactin Antibody**

Purified Rabbit Polyclonal Antibody Catalog # ABV11614

### **Specification**

## **Prolactin Antibody - Product Information**

**Application** WB **Primary Accession** P01237 NP 036761 Other Accession Reactivity Rat Host **Rabbit** Clonality **Polyclonal** Isotype Rabbit IgG Calculated MW 25753

### **Prolactin Antibody - Additional Information**

#### **Gene ID 24683**

#### **Other Names**

PRL, luteotropic hormone, LTH, PRLR, PRL-R, PRL R

## **Target/Specificity**

Prolactin

#### **Formulation**

 $100 \mu g$  (0.5 mg/ml) affinity purified rabbit anti-rat Prolactin polyclonal antibody in phosphate buffered saline (PBS), pH 7.2, containing 30% glycerol and 0.01% thimerosal.

#### **Handling**

The antibody solution should be gently mixed before use.

### **Background Descriptions**

#### **Precautions**

Prolactin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### **Prolactin Antibody - Protein Information**

#### Name Prl

#### **Function**

Prolactin acts primarily on the mammary gland by promoting lactation.

### **Cellular Location**

Secreted.

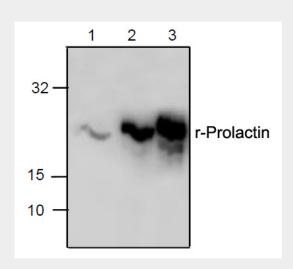

## **Prolactin Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# **Prolactin Antibody - Images**

### **Prolactin Antibody - Background**

Prolactin (also known as mammotrophin, luterotropic hormone, and lutetropin) is a neuroendocrine hormone secreted by the pituitary gland. Its primary function is to promote and maintain lactation during pregnancy and suckling. In addition, Prolactin plays an immune-regulatory role by stimulating the activities of ornithine decarboxylase and protein kinase C, which are important for the proliferation, differentiation, and function of lymphocytes. Rat Prolactin is a 22.5 kDa globular protein containing 198 amino acid residues.
