

Calponin Antibody
Mouse Monoclonal Antibody (Mab)
Catalog # AD80056**Specification**

Calponin Antibody - Product info

Application	IHC
Primary Accession	P51911
Reactivity	Human
Host	Mouse
Clonality	Monoclonal
Isotype	IgG1
Calculated MW	33170

Calponin Antibody - Additional info

Gene ID	1264
Gene Name	CNN1
Other Names	
Calponin-1, Basic calponin, Calponin H1, smooth muscle, CNN1	

Dilution
IHC~~Ready-to-use**Storage**
Maintain refrigerated at 2-8°C

Precautions	Calponin Antibody is for research use only and not for use in diagnostic or therapeutic procedures.
-------------	--

Calponin Antibody - Protein Information**Name** CNN1

Function	Thin filament-associated protein that is implicated in the regulation and modulation of smooth muscle contraction. It is capable of binding to actin, calmodulin, troponin C and tropomyosin. The interaction of calponin with actin inhibits the actomyosin Mg-ATPase activity (By similarity).
Tissue Location	Smooth muscle, and tissues containing significant amounts of smooth muscle

Calponin Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Calponin Antibody - Images

Immunohistochemical analysis of paraffin-embedded human normal breast tissue using AD80056 performed on the Abcarta® FAIP-30 Fully automated IHC platform. Tissue was fixed with formaldehyde at room temperature, antigen retrieval was by heat mediation with a Citrate buffer (pH6.0). Samples were incubated with primary antibody (Ready-to-use) for 15 min at room temperature. AmpSee™ Detection Systems [Abcepta:AR005] was used as the secondary antibody.
