

CD14

Rabbit Monoclonal antibody(Mab)
Catalog # AD80058

Specification

CD14 - Product info

Application IHC-P
Primary Accession P08571
Reactivity Human
Host Rabbit
Clonality Monoclonal
Calculated MW 40076

CD14 - Additional info

Gene ID 929
Gene Name CD14

Other Names

Monocyte differentiation antigen CD14, Myeloid cell-specific leucine-rich glycoprotein, CD14, Monocyte differentiation antigen CD14, urinary form, Monocyte differentiation antigen CD14, membrane-bound form, CD14

Dilution

IHC-P~~Ready-to-use

Storage

Maintain refrigerated at 2-8°C

Precautions CD14 Antibody is for research use only and

not for use in diagnostic or therapeutic

procedures.

CD14 - Protein Information

Name CD14

Function Coreceptor for bacterial

lipopolysaccharide (PubMed:1698311, PubMed:23264655). In concert with LBP, binds to monomeric lipopolysaccharide and delivers it to the LY96/TLR4 complex, thereby mediating the innate immune response to bacterial lipopolysaccharide

(LPS) (PubMed: 20133493,

PubMed: 23264655). Acts via MyD88, TIRAP and TRAF6, leading to NF-kappa-B activation, cytokine secretion and the inflammatory response (PubMed: 8612135).

Acts as a coreceptor for TLR2:TLR6

Cellular Location

Tissue Location

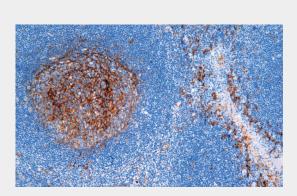

heterodimer in response to diacylated lipopeptides and for TLR2:TLR1 heterodimer in response to triacylated lipopeptides, these clusters trigger signaling from the cell surface and subsequently are targeted to the Golgi in a lipid-raft dependent pathway (PubMed: 16880211). Binds electronegative LDL (LDL(-)) and mediates the cytokine release induced by LDL(-) (PubMed: 23880187). Cell membrane; Lipid- anchor, GPI-anchor. Secreted Membrane raft. Golgi apparatus. **Note=Secreted forms may arise by** cleavage of the GPI anchor. **Detected on macrophages (at protein** level) (PubMed:1698311). Expressed strongly on the surface of monocytes and weakly on the surface of granulocytes; also expressed by most tissue macrophages.

CD14 - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

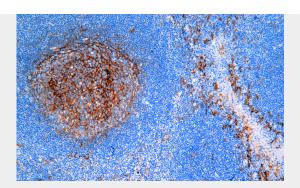

CD14 - Images

Tonsil

Immunohistochemical analysis of paraffin-embedded human tonsil tissue using AD80058 performed on the Abcarta® FAIP-30 Fully automated IHC platform. Tissue was fixed with formaldehyde at room temperature, antigen retrieval was by heat mediation with a EDTA buffer (pH9. 0). Samples were incubated with primary antibody(Ready-to-use) for 15 min at room temperature. AmpSeeTM Detection Systems Abcepta: AR005 was used as the secondary antibody.
