**COX-2 - Protein Information**

**Name** PTGS2 ([HGNC:9605](#))

**Synonyms**  
**Function**

**COX2**  
Converts arachidonate to prostaglandin H2 (PGH2), a committed step in prostanoid synthesis (PubMed:[26859324](#), PubMed:[27226593](#)). Constitutively expressed in some tissues in physiological conditions, such as the endothelium, kidney and brain, and in pathological conditions, such as in cancer. PTGS2 is responsible for production of inflammatory prostaglandins. Up- regulation of PTGS2 is also associated with increased cell

adhesion, phenotypic changes, resistance to apoptosis and tumor angiogenesis. In cancer cells, PTGS2 is a key step in the production of prostaglandin E2 (PGE2), which plays important roles in modulating motility, proliferation and resistance to apoptosis.

Liver

Immunohistochemical analysis of paraffin-embedded human liver tissue using AD80426 performed on the Abcarta® FAIP-30 Fully automated IHC platform. Tissue was fixed with formaldehyde at room temperature, antigen retrieval was by heat mediation with a EDTA buffer (pH9. 0). Samples were incubated with primary antibody(Ready-to-use) for 15 min at room temperature. AmpSee™ Detection Systems□Abcepta:AR005□ was used as the secondary

antibody.
