

CD14 antibody

Mouse Monoclonal Antibody (Mab) Catalog # AD80513

Specification

CD14 antibody - Product info

Application Primary Accession Reactivity Host Clonality Calculated MW

P08571 Human Mouse Monoclonal 40076 Da

IHC

CD14 antibody - Additional info

Gene ID 929 Other Names Monocyte differentiation antigen CD14, Myeloid cell-specific leucine-rich glycoprotein, CD14, Monocyte differentiation antigen CD14, urinary form, Monocyte differentiation antigen CD14, membrane-bound form, CD14

Dilution IHC~~1:100~500

Storage Maintain refrigerated at 2-8°C

Precautions

CD14 antibody is for research use only and not for use in diagnostic or therapeutic procedures.

CD14 antibody - Protein Information

Name CD14

Function

Coreceptor for bacterial lipopolysaccharide (PubMed:<u>1698311</u>, PubMed:<u>23264655</u>). In concert with LBP, binds to monomeric lipopolysaccharide and delivers it to the LY96/TLR4 complex, thereby mediating the innate immune response to bacterial lipopolysaccharide (LPS) (PubMed:<u>20133493</u>, PubMed:<u>23264655</u>, PubMed:<u>22265692</u>). Acts via MyD88, TIRAP and TRAF6, leading to NF-kappa-B activation, cytokine secretion and the inflammatory response (PubMed:<u>8612135</u>). Acts as a coreceptor for TLR2:TLR6 heterodimer in response to

	diacylated lipopeptides and for TLR2:TLR1 heterodimer in response to triacylated lipopeptides, these clusters trigger signaling from the cell surface and subsequently are targeted to the Golgi in a lipid-raft dependent pathway (PubMed: <u>16880211</u>). Binds electronegative LDL (LDL(-)) and mediates the cytokine release induced by LDL(-)
	(PubMed: <u>23880187</u>).
Cellular Location	Cell membrane; Lipid-anchor, GPI-anchor. Secreted. Membrane raft. Golgi apparatus. Note=Secreted forms may arise by cleavage of the GPI anchor.
Tissue Location	Detected on macrophages (at protein level) (PubMed:1698311). Expressed strongly on the surface of monocytes and weakly on the surface of granulocytes; also expressed by most tissue macrophages.

CD14 antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- <u>Western Blot</u>
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- <u>Flow Cytomety</u>
- <u>Cell Culture</u>
