

H3.3G34W

Rabbit Monoclonal antibody(Mab)
Catalog # AD80561

Specification

H3.3G34W - Product info

Application IHC-P
Primary Accession P84243
Reactivity Human
Host Rabbit
Clonality Monoclonal
Calculated MW 15328

H3.3G34W - Additional info

Gene ID 3020;3021
Other Names
Histone H3.3, H3-3A (HGNC:4764), H3.3A, H3F3, H3F3A

Dilution IHC-P~~N/A

Storage

Maintain refrigerated at 2-8°C

H3.3G34W - Protein Information

Name H3-3A (<u>HGNC:4764</u>)

Synonyms Function H3.3A, H3F3, H3F3A

Variant histone H3 which replaces conventional H3 in a wide range of nucleosomes in active genes. Constitutes the predominant form of histone H3 in non-dividing cells and is incorporated into chromatin independently of DNA synthesis. Deposited at sites of nucleosomal displacement throughout transcribed genes, suggesting that it represents an epigenetic imprint of transcriptionally active chromatin. Nucleosomes wrap and compact DNA into chromatin, limiting DNA accessibility to the cellular machineries which require DNA as a template. Histones thereby play a central role in transcription regulation, DNA repair, DNA replication

Tel: 858.875.1900 Fax: 858.875.1999

and chromosomal stability. DNA accessibility is regulated via a complex set of post-translational modifications of histones, also called histone code, and nucleosome remodeling. **Nucleus. Chromosome**

Cellular Location

H3.3G34W - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture
