

### Functional VEGF-A (human) Antibody, mAb

Catalog # ADP0019

## **Specification**

### Functional VEGF-A (human) Antibody, mAb - Product Information

Application WB, E
Primary Accession P15692
Reactivity Human
Clonality Monoclonal
Isotype Mouse IgG1
Gene Source Human

Application Note ,E(1-15 μg/ml),Functional

Application, Neutralization, WB(2-10 μg/ml),

Calculated MW 43597

Dilution WB~~1:1000

 $E\sim\sim N/A$ 

### Functional VEGF-A (human) Antibody, mAb - Additional Information

**Gene ID 7422** 

**Other Names** 

Vascular Endothelial Growth Factor-A; VPF

**Format** 

Lyophilized.

# **Reconstitution & Storage**

Stable for at least 6 months after receipt when stored at -20°C.

### **Precautions**

Functional VEGF-A (human) Antibody, mAb is for research use only and not for use in diagnostic or therapeutic procedures.

### Functional VEGF-A (human) Antibody, mAb - Protein Information

Name VEGFA

**Synonyms VEGF** 

#### **Function**

[N-VEGF]: Participates in the induction of key genes involved in the response to hypoxia and in the induction of angiogenesis such as HIF1A (PubMed:<a

href="http://www.uniprot.org/citations/35455969" target="\_blank">35455969</a>). Involved in protecting cells from hypoxia- mediated cell death (By similarity).

#### **Cellular Location**

[N-VEGF]: Cytoplasm. Nucleus. Note=Cytoplasmic in normoxic conditions and localizes to the

Tel: 858.875.1900 Fax: 858.875.1999

nucleus under hypoxic conditions [Isoform L-VEGF189]: Endoplasmic reticulum. Golgi apparatus. Secreted, extracellular space, extracellular matrix [Isoform VEGF165]: Secreted

#### **Tissue Location**

Higher expression in pituitary tumors than the pituitary gland. [Isoform VEGF165]: Widely expressed. [Isoform VEGF206]: Not widely expressed.

### Functional VEGF-A (human) Antibody, mAb - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

## Functional VEGF-A (human) Antibody, mAb - Images

# Functional VEGF-A (human) Antibody, mAb - Background

Human vascular endothelial erowth factor (VEGF 165) is produced as a homodimer. It binds to the FLT1/VEGFR1 and KDR/VEGFR2 receptors, heparan sulfate and heparin. VEGF-A is a specific mitogen for vascular endothelial cells and a strong angiogenic factor in vivo. In addition to its action as a mitogen it is a potent vascular permeability factor (VPF) in vivo. It is also a chemoattractant molecule for monocytes and endothelial cells. It induces endothelial cell proliferation, promotes cell migration, inhibits apoptosis and induces permeabilization of blood vessels.
