

**Phospho-AFX-S197 Antibody**  
**Purified Rabbit Polyclonal Antibody (Pab)**  
**Catalog # AE1004b****Specification**

---

**Phospho-AFX-S197 Antibody - Product Information**

Application	WB, IHC, IF
Primary Accession	<a href="#">P98177</a>
Reactivity	Human, Mouse, Rat
Host	Rabbit
Clonality	Polyclonal
Concentration	1mg/ml
Isotype	Rabbit IgG
Calculated MW	53684

**Phospho-AFX-S197 Antibody - Additional Information****Gene ID** 4303**Other Names**

Forkhead box protein O4, Fork head domain transcription factor AFX1, FOXO4, AFX, AFX1, MLLT7

**Target/Specificity**

The antibody was affinity-purified from rabbit antiserum using epitope-specific phosphopeptide column, and the antibody against non-phosphopeptide was removed using non-phosphopeptide column corresponding to the phosphorylation site.

**Dilution**

WB~~1:500~1:1000

IHC~~1:50~1:100

IF~~1:100~200

**Format**

affinity Purified IgG, in PBS, 0.02% sodium azide and 50% glycerol.

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Phospho-AFX-S197 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Phospho-AFX-S197 Antibody - Protein Information****Name** FOXO4

**Synonyms** AFX, AFX1, MLLT7

### Function

Transcription factor involved in the regulation of the insulin signaling pathway. Binds to insulin-response elements (IREs) and can activate transcription of IGFBP1. Down-regulates expression of HIF1A and suppresses hypoxia-induced transcriptional activation of HIF1A-modulated genes. Also involved in negative regulation of the cell cycle. Involved in increased proteasome activity in embryonic stem cells (ESCs) by activating expression of PSMD11 in ESCs, leading to enhanced assembly of the 26S proteasome, followed by higher proteasome activity.

### Cellular Location

Cytoplasm. Nucleus. Note=When phosphorylated, translocated from nucleus to cytoplasm. Dephosphorylation triggers nuclear translocation. Monoubiquitination increases nuclear localization. When deubiquitinated, translocated from nucleus to cytoplasm

### Tissue Location

Heart, brain, placenta, lung, liver, skeletal muscle, kidney and pancreas. Isoform zeta is most abundant in the liver, kidney, and pancreas

## Phospho-AFX-S197 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

## Phospho-AFX-S197 Antibody - Images

Western blot analysis of extracts from 293 cells using AFX Antibody (S197) (#AE1004a, Lane 1 and 2) and Phospho-AFX-S197 Antibody (#AE1004b, Lane 3 and 4).

Immunohistochemical analysis of paraffinembedded human breast carcinoma tissue using Phospho-AFX-S197 Antibody (#AE1004b).

Immunofluorescence staining of methanol-fixed MCF7 cells using Phospho-AFX-S197 Antibody

### **Phospho-AFX-S197 Antibody - Background**

This gene encodes a member of the O class of winged helix/forkhead transcription factor family. Proteins encoded by this class are regulated by factors involved in growth and differentiation indicating they play a role in these processes. A translocation involving this gene on chromosome X and the homolog of the Drosophila trithorax gene, encoding a DNA binding protein, located on chromosome 11 is associated with leukemia. Multiple transcript variants encoding different isoforms have been found for this gene.
