

Goat Anti-AIP / ARA9 Antibody
Peptide-affinity purified goat antibody
Catalog # AF1040a**Specification**

Goat Anti-AIP / ARA9 Antibody - Product Information

| | |
|-------------------|---|
| Application | WB, E |
| Primary Accession | O00170 |
| Other Accession | NP_003968 , 9049 , 11632 (mouse) , 282827 (rat) |
| Reactivity | Human, Mouse |
| Predicted | Rat, Dog |
| Host | Goat |
| Clonality | Polyclonal |
| Concentration | 100ug/200ul |
| Isotype | IgG |
| Calculated MW | 37664 |

Goat Anti-AIP / ARA9 Antibody - Additional Information**Gene ID** 9049**Other Names**

AH receptor-interacting protein, AIP, Aryl-hydrocarbon receptor-interacting protein, HBV X-associated protein 2, XAP-2, Immunophilin homolog ARA9, AIP, XAP2

Dilution

WB~~1:1000

E~~N/A

Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-AIP / ARA9 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-AIP / ARA9 Antibody - Protein Information**Name** AIP**Synonyms** XAP2

Function

May play a positive role in AHR-mediated (aromatic hydrocarbon receptor) signaling, possibly by influencing its receptivity for ligand and/or its nuclear targeting.

Cellular Location

Cytoplasm.

Tissue Location

Widely expressed. Higher levels seen in the heart, placenta and skeletal muscle. Not expressed in the liver

Goat Anti-AIP / ARA9 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

Goat Anti-AIP / ARA9 Antibody - Images

AF1040a (0.02 µg/ml) staining of NIH/3T3 cell lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

HEK293 overexpressing ARA9 (RC211157) and probed with AF1040a (mock transfection in first lane), tested by Origene.

Goat Anti-AIP / ARA9 Antibody - Background

The protein encoded by this gene is a receptor for aryl hydrocarbons and a ligand-activated transcription factor. The encoded protein is found in the cytoplasm as part of a multiprotein complex, but upon binding of ligand is transported to the nucleus. This protein can regulate the expression of many xenobiotic metabolizing enzymes. Also, the encoded protein can bind specifically to and inhibit the activity of hepatitis B virus.
