

### **Goat Anti-ARPC3 Antibody**

Peptide-affinity purified goat antibody Catalog # AF1110a

## **Specification**

## **Goat Anti-ARPC3 Antibody - Product Information**

Application WB, E
Primary Accession O15145

Other Accession <u>NP\_005710</u>, <u>10094</u>, <u>56378 (mouse)</u>

Reactivity Human, Mouse

Predicted Rat, Dog
Host Goat
Clonality Polyclonal
Concentration 100ug/200ul

Isotype IgG
Calculated MW 20547

# **Goat Anti-ARPC3 Antibody - Additional Information**

### **Gene ID** 10094

## **Other Names**

Actin-related protein 2/3 complex subunit 3, Arp2/3 complex 21 kDa subunit, p21-ARC, ARPC3, ARC21

#### **Dilution**

WB~~1:1000

E~~N/A

## **Format**

0.5 mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

#### **Precautions**

Goat Anti-ARPC3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## **Goat Anti-ARPC3 Antibody - Protein Information**

# Name ARPC3

Synonyms ARC21

#### **Function**

Component of the Arp2/3 complex, a multiprotein complex that mediates actin polymerization upon stimulation by nucleation-promoting factor (NPF) (PubMed:<a

href="http://www.uniprot.org/citations/9230079" target="\_blank">9230079</a>). The Arp2/3 complex mediates the formation of branched actin networks in the cytoplasm, providing the force for cell motility (PubMed:<a href="http://www.uniprot.org/citations/9230079"

target="\_blank">9230079</a>). In addition to its role in the cytoplasmic cytoskeleton, the Arp2/3 complex also promotes actin polymerization in the nucleus, thereby regulating gene transcription and repair of damaged DNA (PubMed:<a href="http://www.uniprot.org/citations/29925947" target="\_blank">29925947</a>). The Arp2/3 complex promotes homologous recombination (HR) repair in response to DNA damage by promoting nuclear actin polymerization, leading to drive motility of double-strand breaks (DSBs) (PubMed:<a

href="http://www.uniprot.org/citations/29925947" target="\_blank">29925947</a>).

#### **Cellular Location**

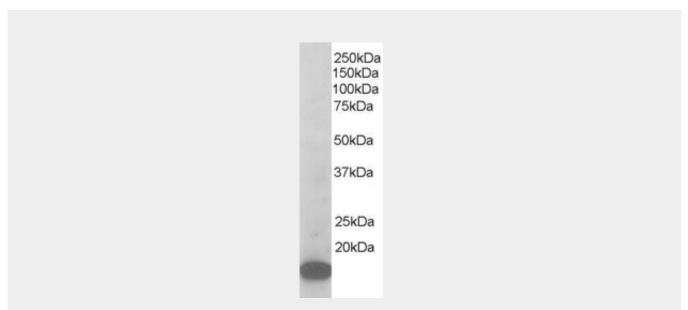

Cytoplasm, cytoskeleton. Cell projection Nucleus

## Goat Anti-ARPC3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- <u>Immunohistochemistry</u>
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# Goat Anti-ARPC3 Antibody - Images

AF1110a staining (1  $\mu$ g/ml) of Mouse Brain lysate (RIPA buffer, 35  $\mu$ g total protein per lane). Primary incubated for 1 hour. Detected by western blot using chemiluminescence.

## Goat Anti-ARPC3 Antibody - Background

This gene encodes one of seven subunits of the human Arp2/3 protein complex. The Arp2/3 protein

complex has been implicated in the control of actin polymerization in cells and has been conserved through evolution. The exact role of the protein encoded by this gene, the p21 subunit, has yet to be determined.
