

**Goat Anti-Bin3 Antibody**  
Peptide-affinity purified goat antibody  
Catalog # AF1156a

**Specification**

**Goat Anti-Bin3 Antibody - Product Information**

Application	WB
Primary Accession	<a href="#">Q7L2J0</a>
Other Accession	<a href="#">NP_062552</a> , <a href="#">56257</a>
Reactivity	Human
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	74355

**Goat Anti-Bin3 Antibody - Additional Information**

**Gene ID 56257**

**Other Names**

7SK snRNA methylphosphate capping enzyme, MePCE, 2.1.1.-, Bicoid-interacting protein 3 homolog, Bin3 homolog, MEPCE, BCDIN3

**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

**Storage**

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

**Precautions**

Goat Anti-Bin3 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

**Goat Anti-Bin3 Antibody - Protein Information**

**Name** MEPCE {ECO:0000303|PubMed:30559425, ECO:0000312|HGNC:HGNC:20247}

**Function**

S-adenosyl-L-methionine-dependent methyltransferase that adds a methylphosphate cap at the 5'-end of 7SK snRNA (7SK RNA), leading to stabilize it (PubMed:<a href="http://www.uniprot.org/citations/17643375" target="\_blank">17643375</a>, PubMed:<a href="http://www.uniprot.org/citations/19906723" target="\_blank">19906723</a>, PubMed:<a href="http://www.uniprot.org/citations/30559425" target="\_blank">30559425</a>). Also has a non-enzymatic function as part of the 7SK RNP complex: the 7SK RNP complex sequesters the

positive transcription elongation factor b (P-TEFb) in a large inactive 7SK RNP complex preventing RNA polymerase II phosphorylation and subsequent transcriptional elongation (PubMed:<a href="http://www.uniprot.org/citations/17643375" target="\_blank">17643375</a>). The 7SK RNP complex also promotes snRNA gene transcription by RNA polymerase II via interaction with the little elongation complex (LEC) (PubMed:<a href="http://www.uniprot.org/citations/28254838" target="\_blank">28254838</a>). In the 7SK RNP complex, MEPCE is required to stabilize 7SK RNA and facilitate the assembly of 7SK RNP complex (PubMed:<a href="http://www.uniprot.org/citations/19906723" target="\_blank">19906723</a>). MEPCE has a non-enzymatic function in the 7SK RNP complex; interaction with LARP7 within the 7SK RNP complex occluding its catalytic center (PubMed:<a href="http://www.uniprot.org/citations/19906723" target="\_blank">19906723</a>).

#### Cellular Location

Nucleus.

#### Tissue Location

Expressed in chronic myeloid leukemia cells, adrenal gland, brain, cerebellum, kidney, lung, mammary gland and testis (PubMed:12358911). Weakly or not expressed in other tissues (PubMed:12358911).

#### Goat Anti-Bin3 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

#### Goat Anti-Bin3 Antibody - Images

AF1156a (0.3 µg/ml) staining of K562 lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.
