

#### Goat Anti-Bruno-like 5 Antibody

Peptide-affinity purified goat antibody Catalog # AF1168a

## **Specification**

# Goat Anti-Bruno-like 5 Antibody - Product Information

Application WB

Primary Accession Q8N6W0
Other Accession NP\_068757, 60680

Reactivity
Host
Clonality
Human
Goat
Polyclonal

Concentration 100ug/200ul Isotype IgG
Calculated MW 52355

# Goat Anti-Bruno-like 5 Antibody - Additional Information

#### **Gene ID** 60680

#### **Other Names**

CUGBP Elav-like family member 5, CELF-5, Bruno-like protein 5, CUG-BP- and ETR-3-like factor 5, RNA-binding protein BRUNOL-5, CELF5, BRUNOL5

#### **Format**

0.5 mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

## **Precautions**

Goat Anti-Bruno-like 5 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

## Goat Anti-Bruno-like 5 Antibody - Protein Information

#### Name CELF5

## **Synonyms** BRUNOL5

#### **Function**

RNA-binding protein implicated in the regulation of pre-mRNA alternative splicing. Mediates exon inclusion and/or exclusion in pre- mRNA that are subject to tissue-specific and developmentally regulated alternative splicing. Specifically activates exon 5 inclusion of cardiac isoforms of TNNT2 during heart remodeling at the juvenile to adult transition. Binds to muscle-specific splicing

enhancer (MSE) intronic sites flanking the alternative exon 5 of TNNT2 pre-mRNA.

**Cellular Location** Nucleus. Cytoplasm.

**Tissue Location** Expressed in brain..

# Goat Anti-Bruno-like 5 Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- <u>Immunoprecipitation</u>
- Flow Cytomety
- Cell Culture

# Goat Anti-Bruno-like 5 Antibody - Images

AF1168a (1  $\mu$ g/ml) staining of Human Heart lysate (35  $\mu$ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

## Goat Anti-Bruno-like 5 Antibody - Background

Members of the CELF/BRUNOL protein family contain two N-terminal RNA recognition motif (RRM) domains, one C-terminal RRM domain, and a divergent segment of 160-230 aa between the second and third RRM domains. Members of this protein family regulate pre-mRNA alternative splicing and may also be involved in mRNA editing, and translation. Alternatively spliced transcript variants have been identified in this gene.
