

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody
Peptide-affinity purified goat antibody
Catalog # AF1484a**Specification**

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody - Product Information

Application	WB, IHC, E
Primary Accession	P07203
Other Accession	NP_000572 , 2876
Reactivity	Human, Pig
Host	Goat
Clonality	Polyclonal
Concentration	100ug/200ul
Isotype	IgG
Calculated MW	22088

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody - Additional Information**Gene ID** 2876**Other Names**

Glutathione peroxidase 1, GPx-1, GSHPx-1, 1.11.1.9, Cellular glutathione peroxidase, GPX1

DilutionWB~~1:1000
IHC~~1:100~500
E~~N/A**Format**

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

Precautions

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody - Protein Information**Name** GPX1 ([HGNC:4553](#))**Function**

Catalyzes the reduction of hydroperoxides in a glutathione- dependent manner thus regulating cellular redox homeostasis (PubMed:<a href="http://www.uniprot.org/citations/11115402"

target="_blank">11115402, PubMed:36608588). Can reduce small soluble hydroperoxides such as H₂O₂, cumene hydroperoxide and tert-butyl hydroperoxide, as well as several fatty acid-derived hydroperoxides (PubMed:11115402, PubMed:36608588). In platelets catalyzes the reduction of 12-hydroperoxyeicosatetraenoic acid, the primary product of the arachidonate 12-lipoxygenase pathway (PubMed:11115402).

Cellular Location

Cytoplasm {ECO:0000250|UniProtKB:P11352}. Mitochondrion {ECO:0000250|UniProtKB:P11352}

Tissue Location

Expressed in platelets (at protein level).

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody - Protocols

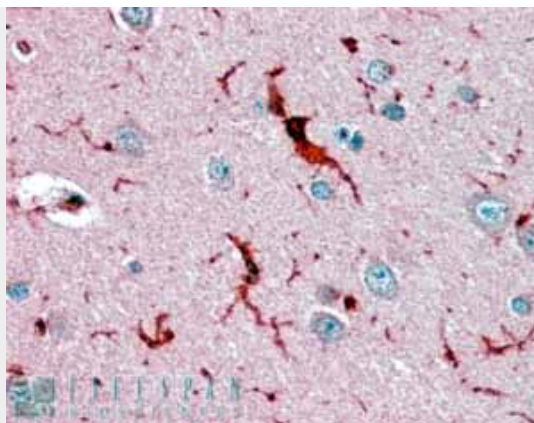

Provided below are standard protocols that you may find useful for product applications.

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody - Images

AF1484a (1 µg/ml) staining of Human Liver lysate (35 µg protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

AF1484a (3.8 µg/ml) staining of paraffin embedded Human Cerebrum. Steamed antigen retrieval with citrate buffer pH 6, AP-staining.

AF1484a (20 µg/ml) staining of PFA-perfused cryosection of Porcine Kidney. Microwave antigen retrieval with citrate buffer pH 3, CY3-staining. Data obtained from Dr. Hrvoje Brzica, University of Zagreb

Goat Anti-Glutathione Peroxidase 1 (isoform1) Antibody - Background

This gene encodes a member of the glutathione peroxidase family. Glutathione peroxidase functions in the detoxification of hydrogen peroxide, and is one of the most important antioxidant enzymes in humans. This protein is one of only a few proteins known in higher vertebrates to contain selenocysteine, which occurs at the active site of glutathione peroxidase and is coded by UGA, that normally functions as a translation termination codon. In addition, this protein is characterized in a polyalanine sequence polymorphism in the N-terminal region, which includes three alleles with five, six or seven alanine (ALA) repeats in this sequence. The allele with five ALA repeats is significantly associated with breast cancer risk. Two alternatively spliced transcript variants encoding distinct isoforms have been found for this gene.
