

# Goat Anti-GOT2 (aa 360 to 373) Antibody

Peptide-affinity purified goat antibody Catalog # AF1490b

### **Specification**

## Goat Anti-GOT2 (aa 360 to 373) Antibody - Product Information

Application WB, E
Primary Accession P00505

Other Accession NP\_002071, 2806, 14719 (mouse), 25721 (rat)

Reactivity
Predicted
Host
Clonality
Concentration
Human
Mouse, Rat
Goat
Polyclonal
100ug/200ul

Isotype IgG
Calculated MW 47518

# Goat Anti-GOT2 (aa 360 to 373) Antibody - Additional Information

#### **Gene ID 2806**

## **Other Names**

Aspartate aminotransferase, mitochondrial, mAspAT, 2.6.1.1, 2.6.1.7, Fatty acid-binding protein, FABP-1, Glutamate oxaloacetate transaminase 2, Kynurenine aminotransferase 4, Kynurenine aminotransferase IV, Kynurenine--oxoglutarate transaminase 4, Kynurenine--oxoglutarate transaminase IV, Plasma membrane-associated fatty acid-binding protein, FABPpm, Transaminase A, GOT2

#### **Dilution**

WB~~1:1000 E~~N/A

### **Format**

0.5 mg lgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

#### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

### **Precautions**

Goat Anti-GOT2 (aa 360 to 373) Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

### Goat Anti-GOT2 (aa 360 to 373) Antibody - Protein Information

Name GOT2 (HGNC:4433)

#### **Function**

Catalyzes the irreversible transamination of the L-tryptophan metabolite L-kynurenine to form kynurenic acid (KA). As a member of the malate-aspartate shuttle, it has a key role in the intracellular NAD(H) redox balance. Is important for metabolite exchange between mitochondria and cytosol, and for amino acid metabolism. Facilitates cellular uptake of long-chain free fatty acids.

#### **Cellular Location**

Mitochondrion matrix. Cell membrane. Note=Exposure to alcohol promotes translocation to the cell membrane.

# Goat Anti-GOT2 (aa 360 to 373) Antibody - Protocols

Provided below are standard protocols that you may find useful for product applications.

- Western Blot
- Blocking Peptides
- Dot Blot
- Immunohistochemistry
- Immunofluorescence
- Immunoprecipitation
- Flow Cytomety
- Cell Culture

# Goat Anti-GOT2 (aa 360 to 373) Antibody - Images

AF1490b (0.3  $\mu$ g/ml) staining of Human Liver cell lysate (35  $\mu$ g protein in RIPA buffer). Primary incubation was 1 hour. Detected by chemiluminescence.

## Goat Anti-GOT2 (aa 360 to 373) Antibody - Background

Glutamic-oxaloacetic transaminase is a pyridoxal phosphate-dependent enzyme which exists in cytoplasmic and inner-membrane mitochondrial forms, GOT1 and GOT2, respectively. GOT plays a role in amino acid metabolism and the urea and tricarboxylic acid cycles. The two enzymes are homodimeric and show close homology.
