

**Goat Anti-IER5 Antibody**  
Peptide-affinity purified goat antibody  
Catalog # AF1554a

### Specification

#### Goat Anti-IER5 Antibody - Product Information

|                   |   |
|-------------------|---|
| Application       | WB, E   |
| Primary Accession | <a href="#">Q5VY09</a>                            |
| Other Accession   | <a href="#">NP_057629</a> , <a href="#">51278</a> |
| Reactivity        | Human   |
| Host              | Goat  |
| Clonality         | Polyclonal  |
| Concentration     | 100ug/200ul                                       |
| Isotype           | IgG   |
| Calculated MW     | 33704   |

#### Goat Anti-IER5 Antibody - Additional Information

##### Gene ID 51278

##### Other Names

Immediate early response gene 5 protein, IER5

##### Format

0.5 mg IgG/ml in Tris saline (20mM Tris pH7.3, 150mM NaCl), 0.02% sodium azide, with 0.5% bovine serum albumin

##### Storage

Maintain refrigerated at 2-8°C for up to 6 months. For long term storage store at -20°C in small aliquots to prevent freeze-thaw cycles.

##### Precautions

Goat Anti-IER5 Antibody is for research use only and not for use in diagnostic or therapeutic procedures.

#### Goat Anti-IER5 Antibody - Protein Information

##### Name IER5

##### Function

Plays a role as a transcription factor (PubMed:<a href="http://www.uniprot.org/citations/22132193" target="\_blank">22132193</a>, PubMed:<a href="http://www.uniprot.org/citations/25355627" target="\_blank">25355627</a>). Mediates positive transcriptional regulation of several chaperone genes during the heat shock response in a HSF1-dependent manner (PubMed:<a href="http://www.uniprot.org/citations/25355627" target="\_blank">25355627</a>, PubMed:<a href="http://www.uniprot.org/citations/25816751" target="\_blank">25816751</a>). Mediates negative transcriptional regulation of CDC25B

expression (PubMed:<a href="http://www.uniprot.org/citations/22132193" target="\_blank">22132193</a>). Plays a role in the dephosphorylation of the heat shock factor HSF1 and ribosomal protein S6 kinase (S6K) by the protein phosphatase PP2A (PubMed:<a href="http://www.uniprot.org/citations/25816751" target="\_blank">25816751</a>, PubMed:<a href="http://www.uniprot.org/citations/26496226" target="\_blank">26496226</a>). Involved in the regulation of cell proliferation and resistance to thermal stress (PubMed:<a href="http://www.uniprot.org/citations/22132193" target="\_blank">22132193</a>, PubMed:<a href="http://www.uniprot.org/citations/25355627" target="\_blank">25355627</a>, PubMed:<a href="http://www.uniprot.org/citations/26496226" target="\_blank">26496226</a>). Involved in the cell cycle checkpoint and survival in response to ionizing radiation (PubMed:<a href="http://www.uniprot.org/citations/19238419" target="\_blank">19238419</a>, PubMed:<a href="http://www.uniprot.org/citations/22132193" target="\_blank">22132193</a>). Associates with chromatin to the CDC25B promoter (PubMed:<a href="http://www.uniprot.org/citations/22132193" target="\_blank">22132193</a>).

### **Cellular Location**

Nucleus. Cytoplasm. Note=Predominantly cytoplasmic (PubMed:25816751). Translocated in the nucleus during heat shock (PubMed:25816751).

### **Tissue Location**

Expressed in acute myeloid leukemia (AML) cells.

### **Goat Anti-IER5 Antibody - Protocols**

Provided below are standard protocols that you may find useful for product applications.

- [Western Blot](#)
- [Blocking Peptides](#)
- [Dot Blot](#)
- [Immunohistochemistry](#)
- [Immunofluorescence](#)
- [Immunoprecipitation](#)
- [Flow Cytometry](#)
- [Cell Culture](#)

### **Goat Anti-IER5 Antibody - Background**

This gene encodes a protein that is similar to other immediate early response proteins. In the mouse, a similar gene may play an important role in mediating the cellular response to mitogenic signals. Studies in rats found the expression of a similar gene to be increased after waking and sleep deprivation.
